THIS UNIT NOT LABELED FOR INDIVIDUAL RETAIL SALE  
1 cup (227g) 4 Tbsp (56g) 8 Tbsp (113g)  
Best Quality

grade AA  
**Ralphs** butter

NET WT. 4 OZ. (113g)

NET WT. 4 OZ. (113g)

10110

- ▣ 1/3 cup butter
- ▣ 1/3 cup white sugar
- ▣ 3 tablespoons and 1-3/4  
teaspoons packed brown sugar
- ▣ 1/3 cup peanut butter
- ▣ 1/4 teaspoon vanilla extract

How can we tell where  
to cut the butter so you  
have  $\frac{1}{3}$  of a cup?

THIS UNIT NOT LABELED FOR INDIVIDUAL RETAIL SALE.

Ingredients: Pasteurized Cream, Salt.

DISTRIBUTED BY: RALPHS GROCERY CO. LOS ANGELES, CALIF. 90054

Rigor

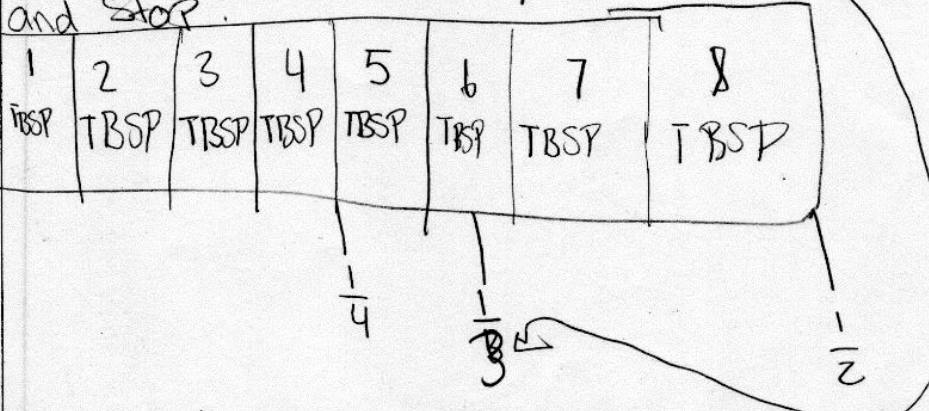

# Standards for Mathematical Practice

1. Make sense of problems and persevere in solving them.
2. Reason abstractly and quantitatively.
3. Construct viable arguments and critique the reasoning of others.
4. Model with mathematics.
5. Use appropriate tools strategically.
6. Attend to precision.
7. Look for and make use of structure.
8. Look for and express regularity in repeated reasoning.

# STUDENT WORK

| What problem are you trying to figure out?  | What guesses do you have?                      |
|---|--|
| <p>How can we tell where to cut the butter so you have <math>\frac{1}{3}</math> of a cup?</p>   | <p>My guess is about between 3 Tbsp.</p>       |
| What do you already know from the problem?  | What do you need to know to solve the problem? |
| <p><i>[Faint handwritten notes]</i></p>   | <p><i>[Faint handwritten notes]</i></p>        |
| What should we title this lesson?   |  |
| <p><i>[Faint handwritten notes]</i></p>   |  |
| What is your conclusion? How did you reach that conclusion?   |  |
| <p>My conclusion is that <math>\frac{1}{3}</math> is right because I knew it had to be between <math>\frac{1}{4}</math> &amp; <math>\frac{1}{2}</math>. I thought it had to be close to <math>\frac{1}{4}</math> and <math>\frac{1}{2}</math>. But I confused and stop.</p>  |  |

What should we title this lesson?

What is your conclusion? How did you reach that conclusion?

$\frac{1}{3}$  is right here because  $5 \times 6 = 30$   
out if you take away the zero you get  
3 like in  $\frac{1}{3}$ .

|      |      |      |      |      |      |      |      |
|------|------|------|------|------|------|------|------|
| 1    | 2    | 3    | 4    | 5    | 6    | 7    | 8    |
| TBSP | TBSP | TBSP | TBSP | TBSP | TBSP | TBSP | TBSP |

3 cup

What should we title this lesson?

What is your conclusion? How did you reach that conclusion?

I got  $5\frac{1}{3}$ . What I did was split 16 Tbsp. into  $\frac{2}{3}$  and I took away  $\frac{2}{3}$  from every Tbsp. and then I grouped 3 groups of  $\frac{1}{3}$  5 times and got 5 whole Tbsp and I had  $\frac{1}{3}$  left so I got  $5\frac{1}{3}$ .

What should we title this lesson?

1 first Quality 1

What is your conclusion? How did you reach that conclusion?

my conclusion was right because I found out  $\frac{1}{3}$  was in between  $\frac{1}{4}$  and  $\frac{1}{2}$  and got my

answer,

CHOOSE CAR SEAT:

There are 125  
sheep and 5 dogs  
in a flock. How old  
is the shepherd?

# Of the 32 students I interviewed...

- 75% of them gave me numerical responses
- 2 students calculated the answer to be 130 ( $125 + 5$ )
- 2 students calculated the answer to be 120 ( $125 - 5$ )
- 12 students calculated the answer to be 25 ( $125 \div 5$ )
- 0 students calculated the answer to be 625 ( $125 \times 5$ )
- 4 students stated that they guessed their answer (90, 5, 42, and 50)
- 4 students tried to divide 125 by 5 but could not correctly implement the procedure

# Takeaways

- Making sense of mathematics
- Intellectual autonomy
  - Intellectual autonomy is about being able to think for yourself and not being dependent on others for the direction and control of one's thinking.

# What Does the NHTSA Say?

## Key Statistics and Consumer Insights:

- Motor vehicle crashes are the leading cause of death for children age 1 through 12 years old.<sup>1</sup>

According to a NHTSA study, 3 out of 4 kids are not as secure in the car as they should be because their car seats are not being used correctly.

be reduced by about half if the correct child safety seats were always used.

---

<sup>1</sup> Source: Based on the latest mortality data currently available from the CDC's National Center for Health Statistics.

The main attraction for a busload of Dover fifth-graders was supposed to be the Museum of Fine Arts, but that all changed when they stopped by Kelly's Roast Beef and got a glimpse of their soda-drinking future.

At the entrance of Kelly's sat a sleek **Coca-Cola** Freestyle fountain crafted to resemble an old-fashioned vending machine, but with a twist: a touchscreen computer embedded in the machine gives customers the option of **125 flavors**. You can quench your thirst with a Coke or a Sprite, or try something more exotic — Sprite with Grape or a Hi-C Orange Vanilla.

# ***WHAT ISN'T MATHEMATICAL MODELING?***

- *It is not modeling in the sense of, “I do; now you do.”*
- *It is not modeling in the sense of using manipulatives to represent mathematical concepts.*
- *It is not modeling in the sense of a “model” being just a graph, equation, or function.*
- *It is not just starting with a real world situation and solving a math problem.*
- *It is not beginning with the mathematics and then moving to the real world.*

# ***PROBLEM- BASED LEARNING FAQ***

- *How long do problem based lessons take?*
- *How often do teachers do problem-based learning?*
- *Do teachers use problem-based lessons to introduce a topic or after you've already taught it?*
- *How is problem-based learning assessed?*
- *How much time does it take to create a problem-based lesson?*

***WHAT  
DOES IT  
LOOK  
LIKE...***

- when students have procedural skill but not conceptual understanding or the ability to apply mathematics?

# The Four C's

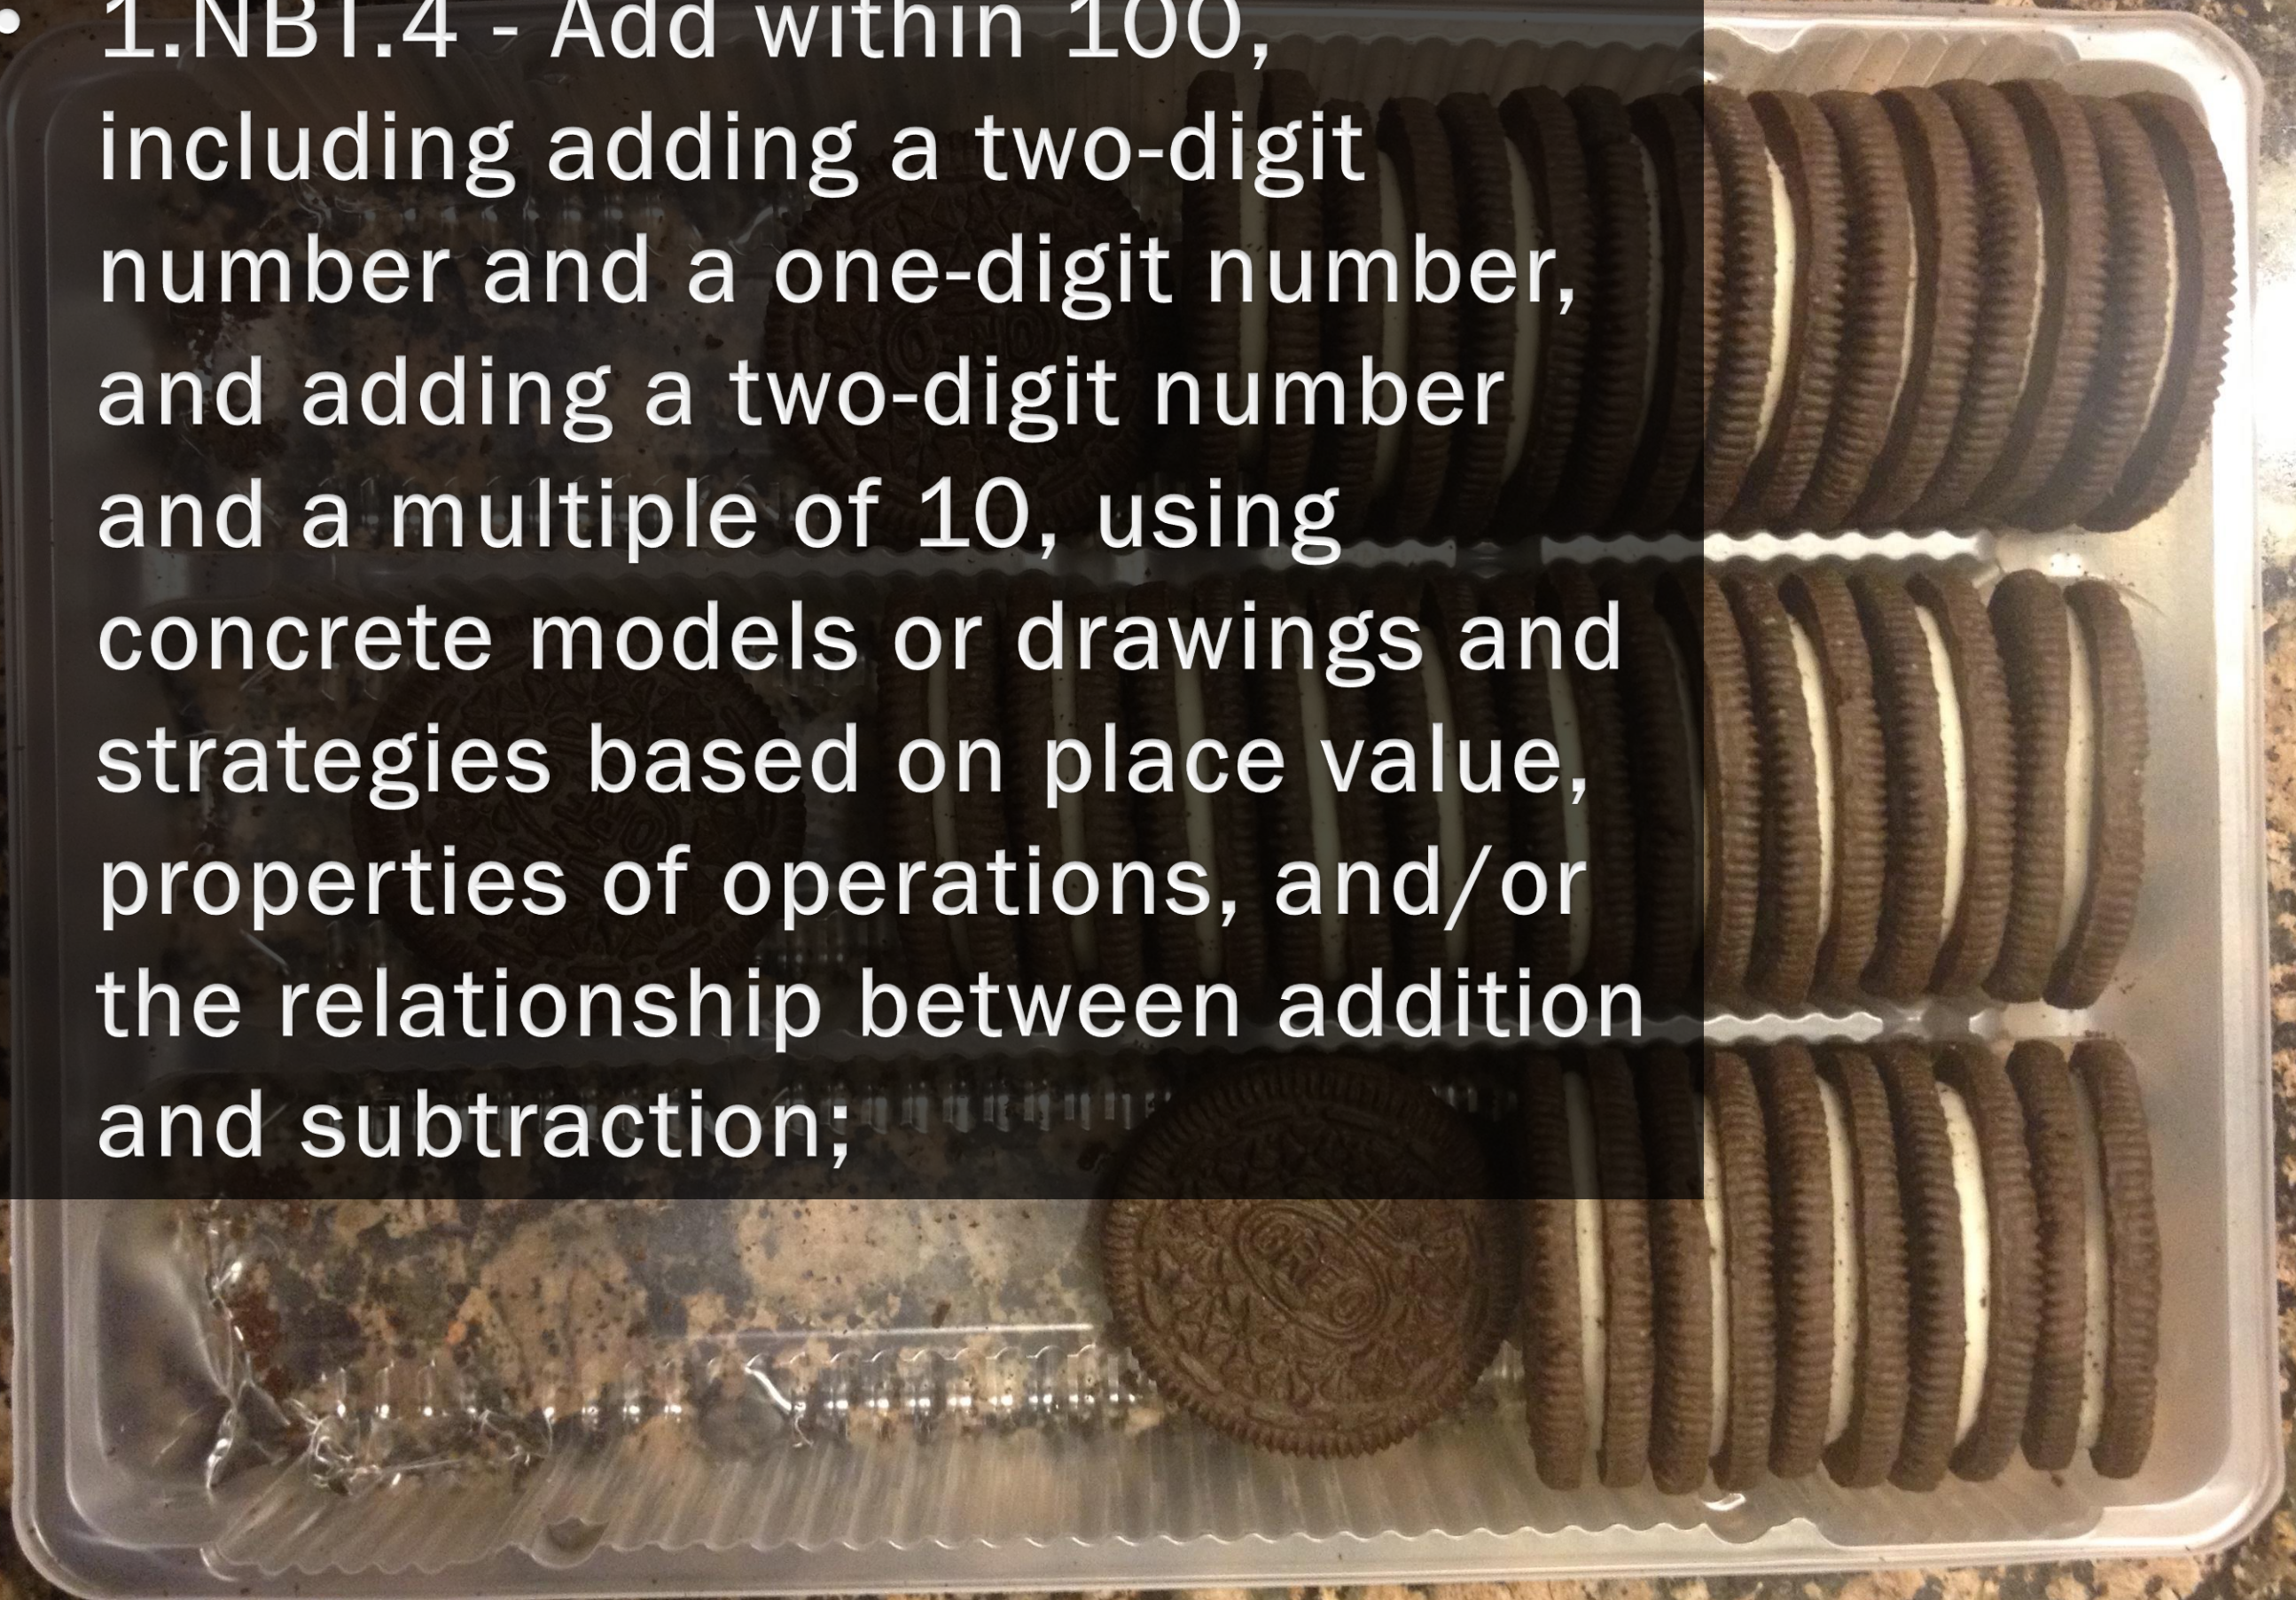

- o Communication
- o Curiosity

- K.NBT.1 - Compose and decompose numbers from 11 to 19 into ten ones and some further ones.
- K.CC.5 - Count to answer "how many?" questions about as many as 20 things arranged in a line.

- 1.NBT.4 - Add within 100, including adding a two-digit number and a one-digit number, and adding a two-digit number and a multiple of 10, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction;

- 2.MD.8 - Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately.

- 3.MD.1 - Tell and write time to the nearest minute and measure time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes.
