Sports Major League baseball has rules for the dimensions of the baseball diamond. A model of the diamond is shown.

 On the model, the distance from the pitching mound to home plate is 1.3 inches. Is 1.3 a rational number? Explain.

8.NS.1, 8.NS.2, 8.EE.2

Mathematical Practices 1, 3, 4, 6

On the model, the distance from first base to second base is 2 inches. Is 2 a rational number? Explain.

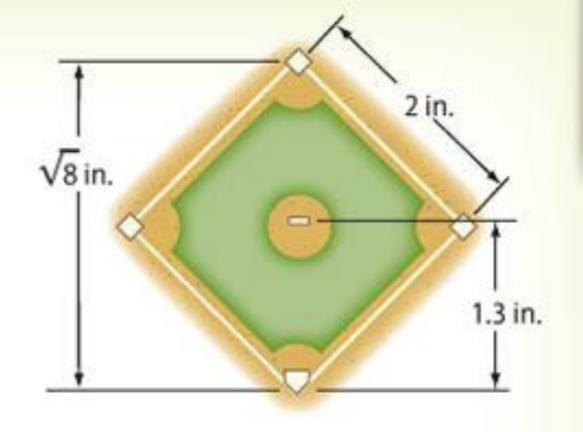

3. The distance from home plate to second base is $\sqrt{8}$ inches. Using a calculator, find $\sqrt{8}$. Does it appear to terminate or repeat?

Doritos & Cheetos Mix 20

DORITOS® Nacho Cheese Flavored Tortilla Chips 1 OZ. EA. DORITOS® COOL RANCH® Flavored Tortilla Chips 1 OZ. EA. CHEETOS® Puffs Cheese Flavored Snacks 7/8 OZ. EA. CHEETOS® Crunchy Cheese Flavored Snacks 1 OZ. EA.

20 INDIVIDUAL BAGS: 1/8 OZ. EACH, 1 OZ. EACH, TOTAL NET WT. 19 5/8 OZ. (1 LB. 3 5/8 OZ.) 556.3 g

WARNING, PREVENT ENTANGLEMENT AND STRANGULATION, KEEP THIS BAG AWAY FROM YOUNG CHILDREN, IT IS NOT A TOY

THINKING TIME

- Why did many of you expect there to be five of each?
- Why was it not five of each?
- How might they decide on this combination?

Classic Mix 20 Singles

LAY'S® Classic Potato Chips, DORITOS® Nacho Cheese Flavored Tortilla Chips, DORITOS® COOL RANCH® Flavored Tortilla Chips, CHEETOS® Crunchy Cheese Flavored Snacks, SUNCHIPS® Original Multigrain Snacks, FRITOS® Original Com Chips (All 1 OZ. Each)

20 INDIVIDUAL BAGS: 1 OZ. EACH, TOTAL NET WT. 20 OZ. (1 LB. 4 OZ.) 567 g A WARNING PREVENT ENTANGLEMENT AND STRANGULATION. KEEP THIS BAG AWAY FROM YOUNG CHILDREN. IT IS NOT A TOY.

GOALS

- **HOW DO WE MAKE SENSE OF MATH MODELING?**
- ☐ IS IT JUST ANSWERING QUESTIONS?
- ☐ HOW DO YOU PROFIT FROM MATH MODELING?
- ☐ HOW DO WE HELP OUR STUDENTS IMPROVE?
- ☐ WHERE CAN WE FIND MORE RESOURCES?

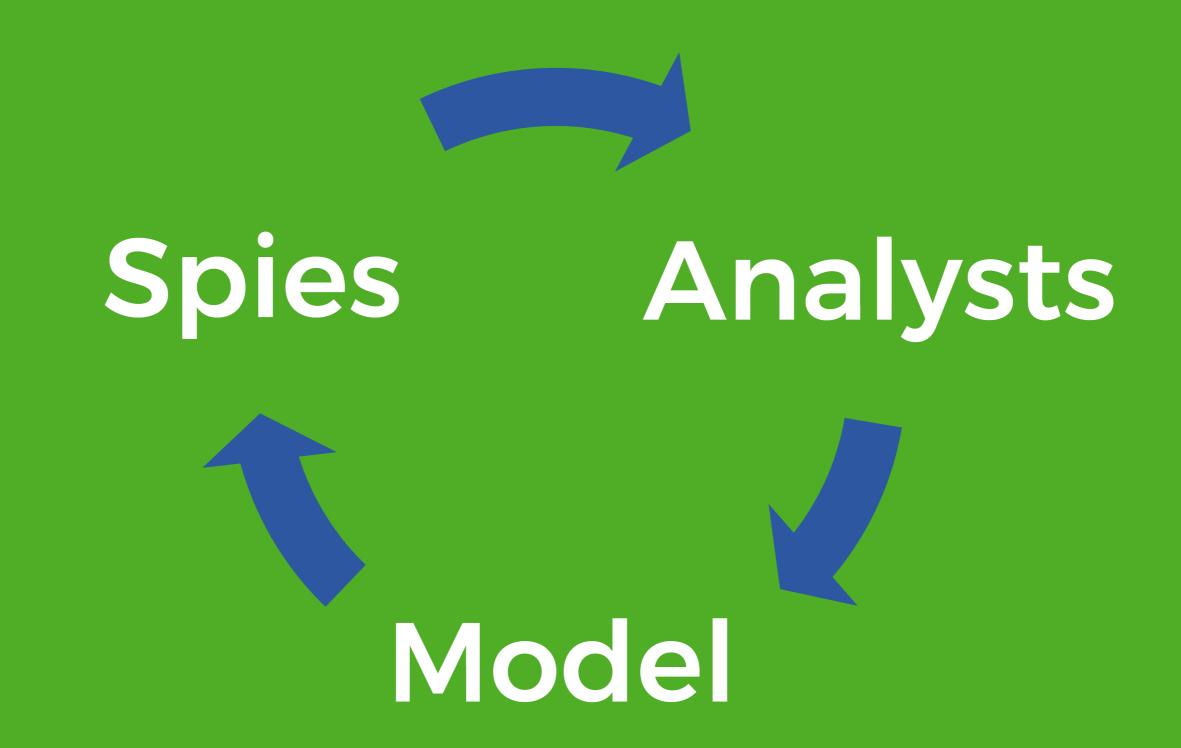

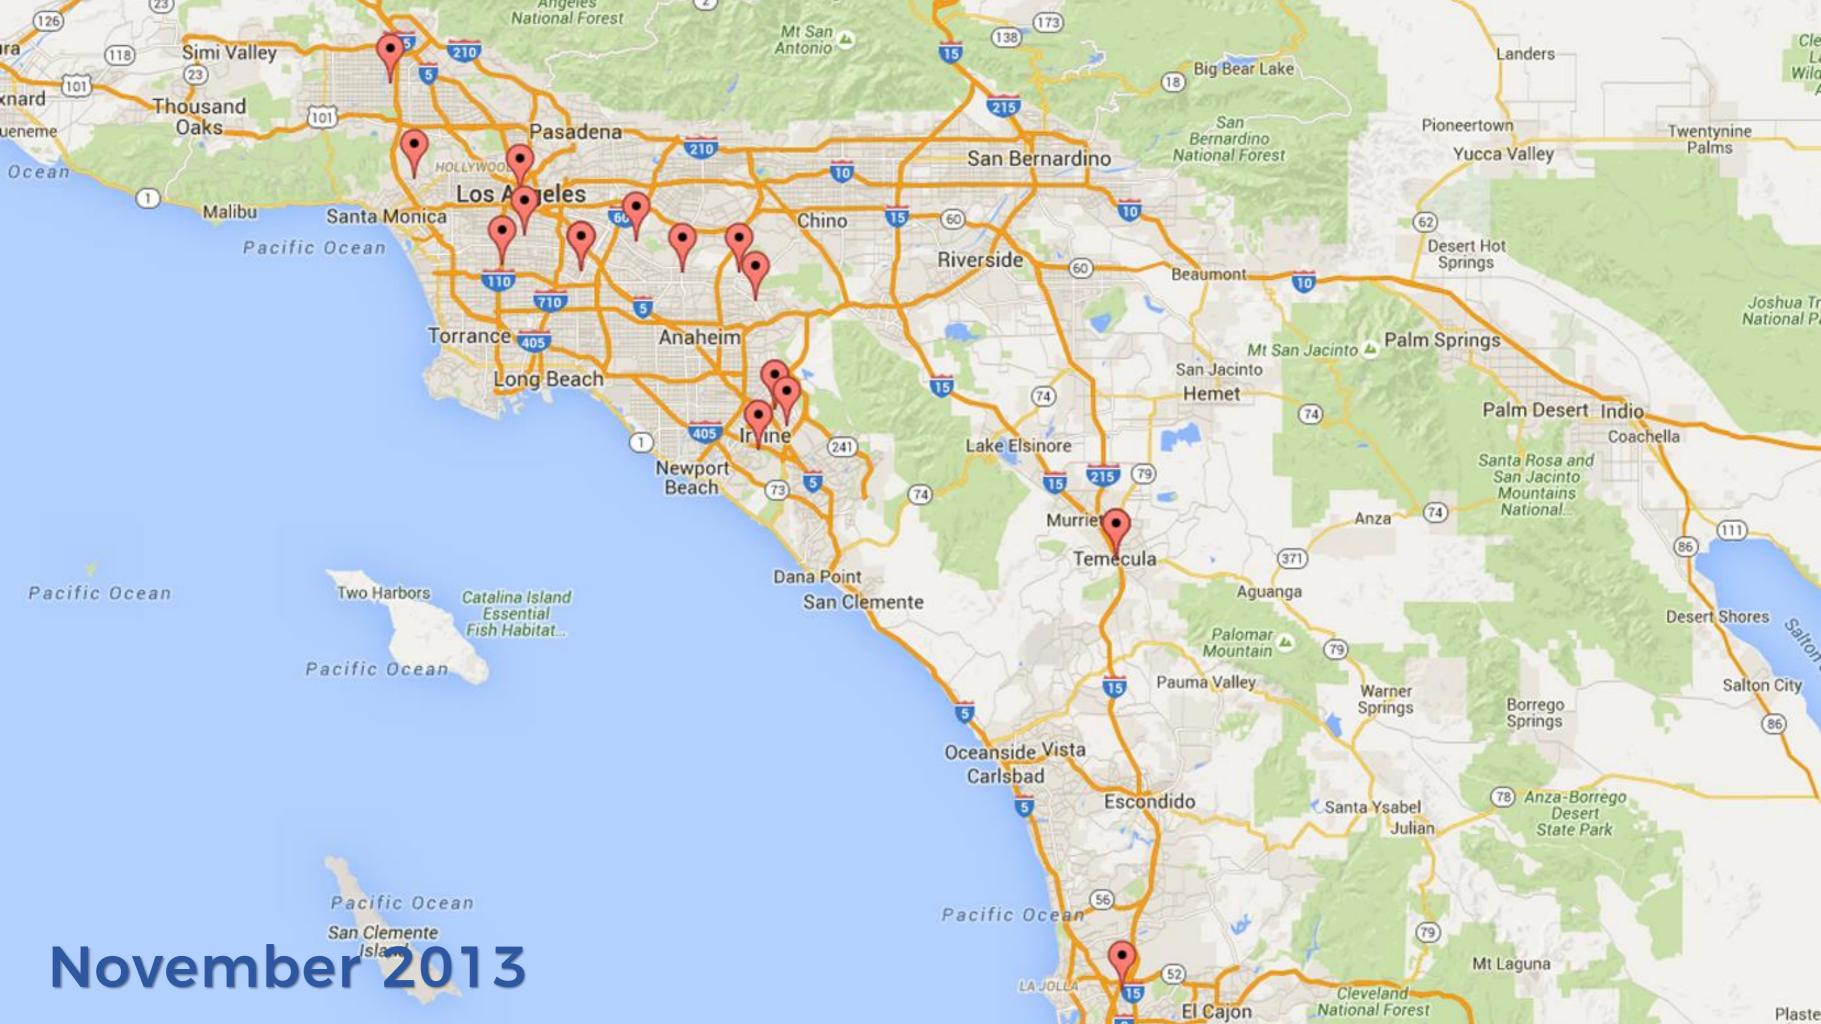

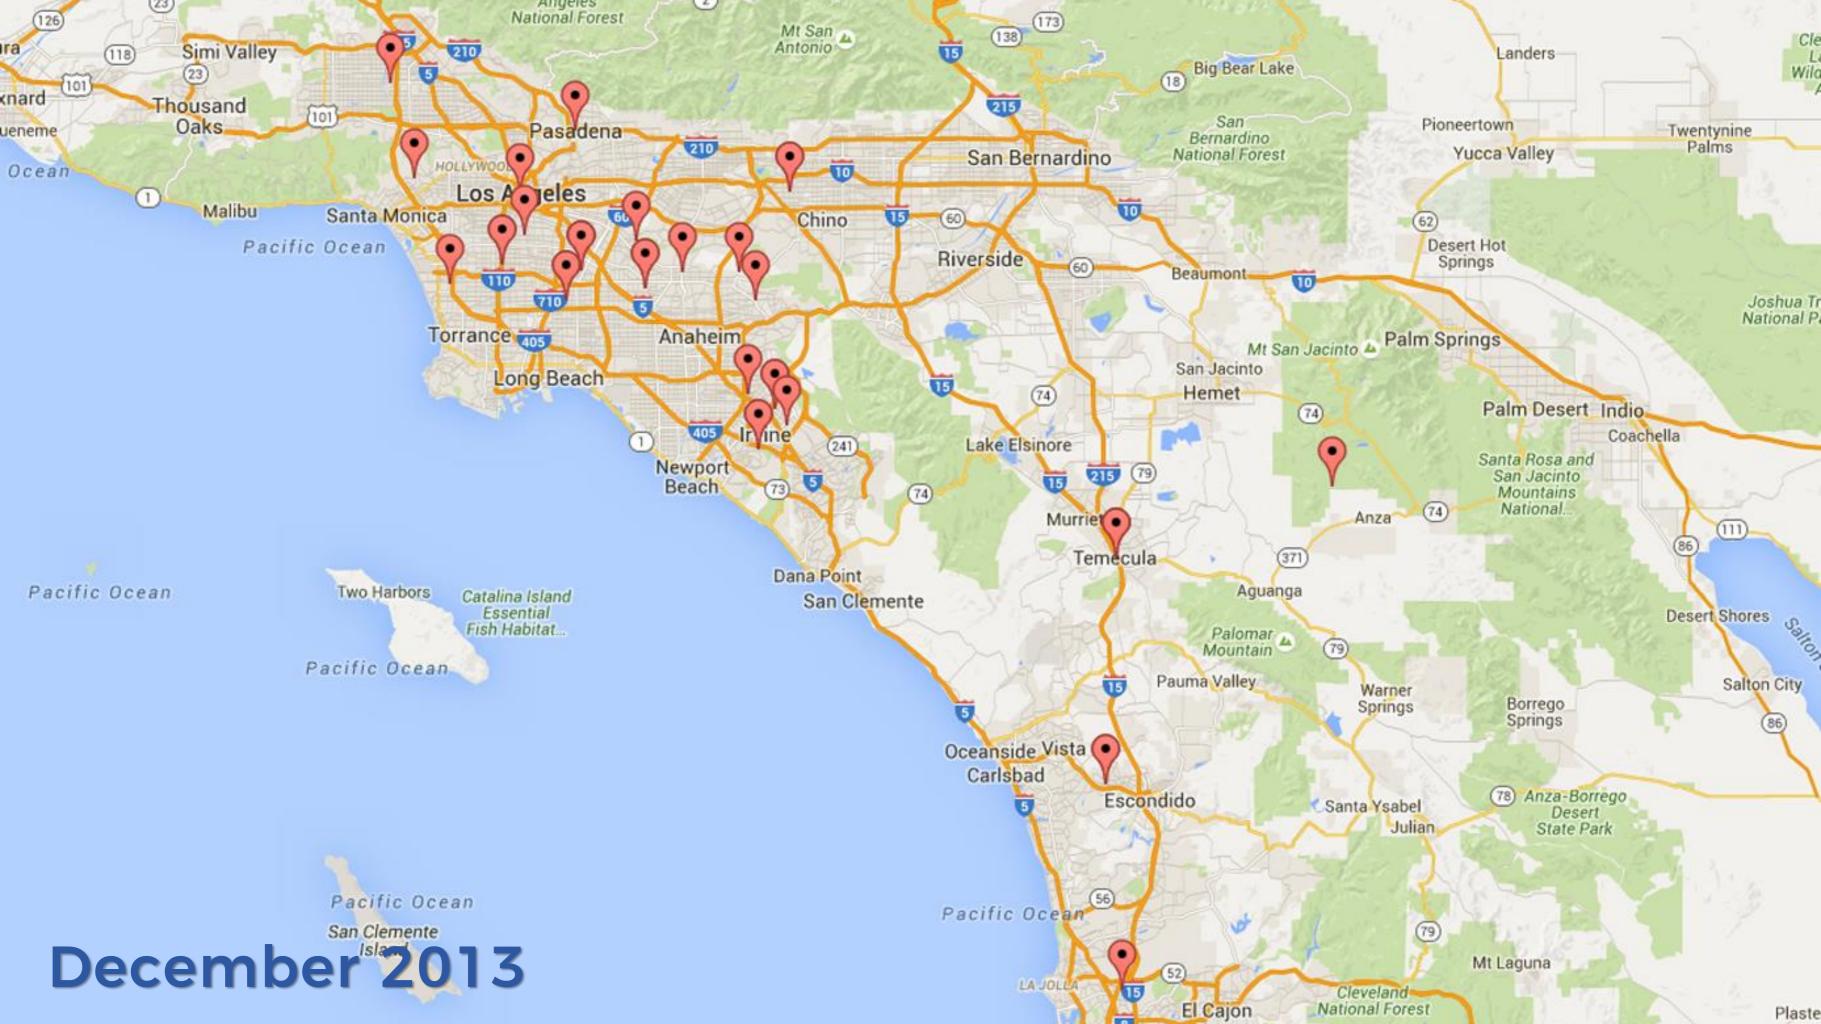

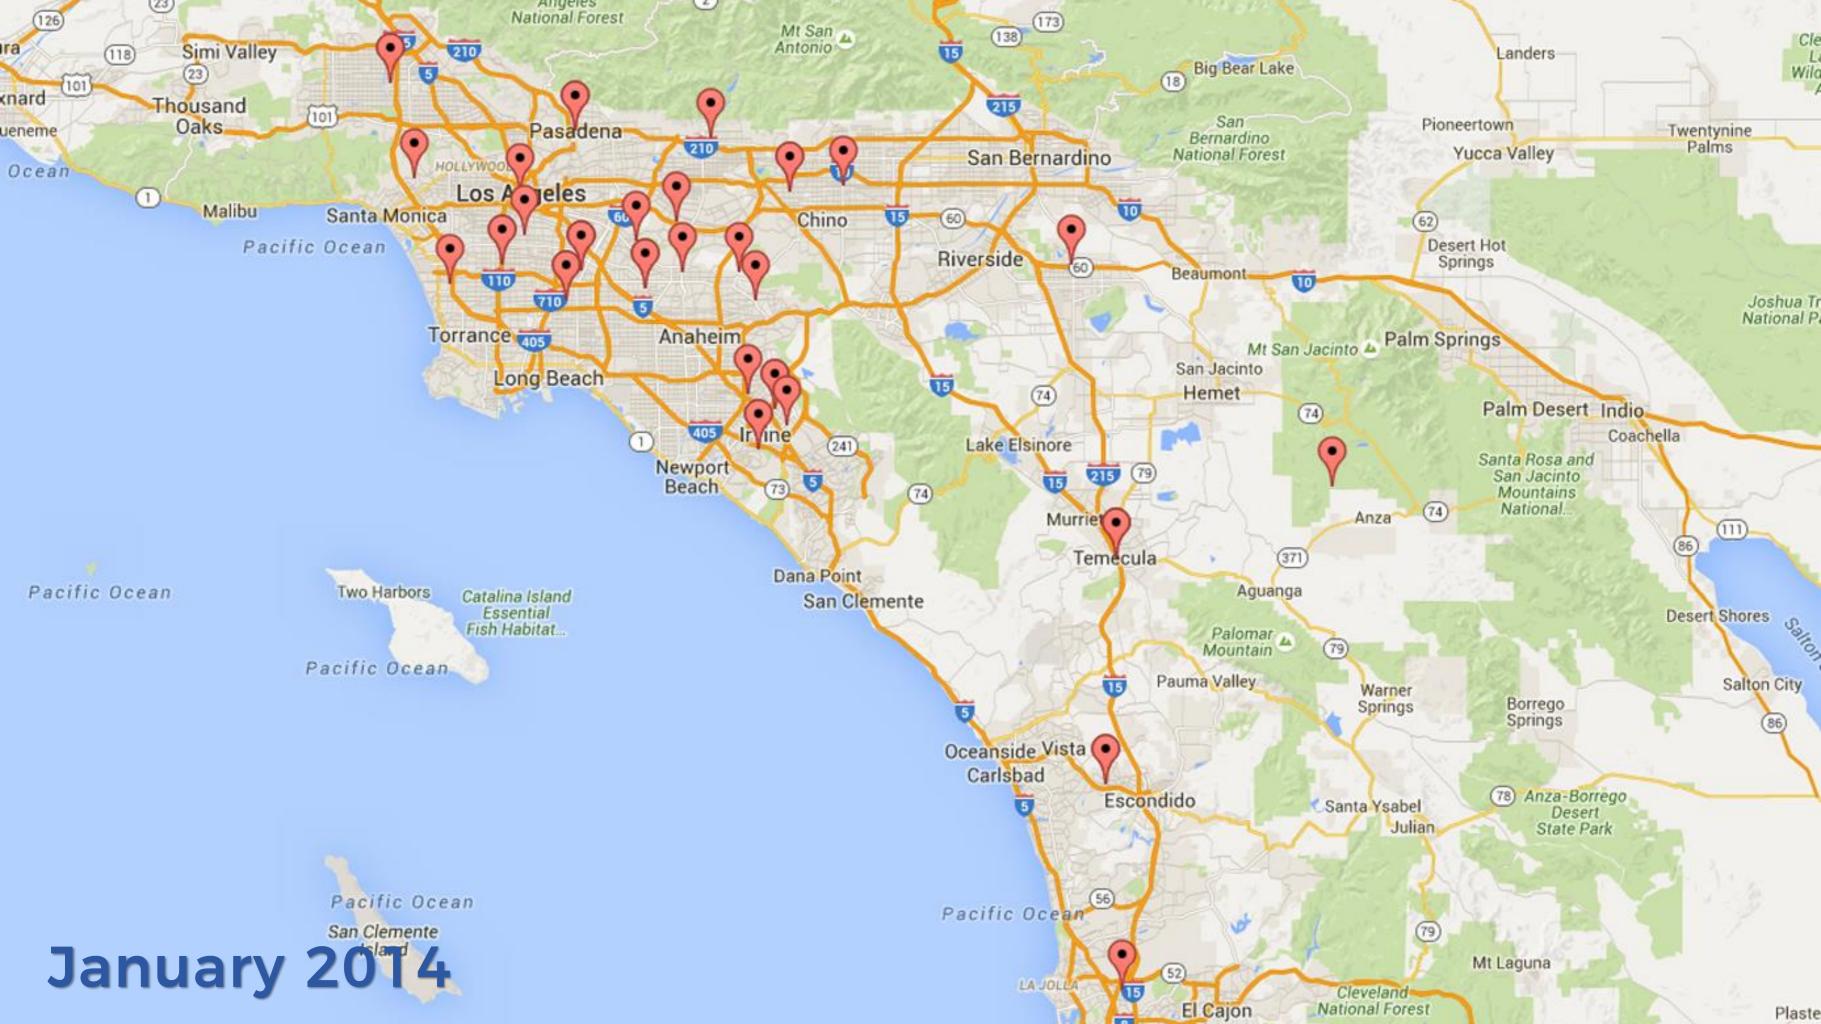

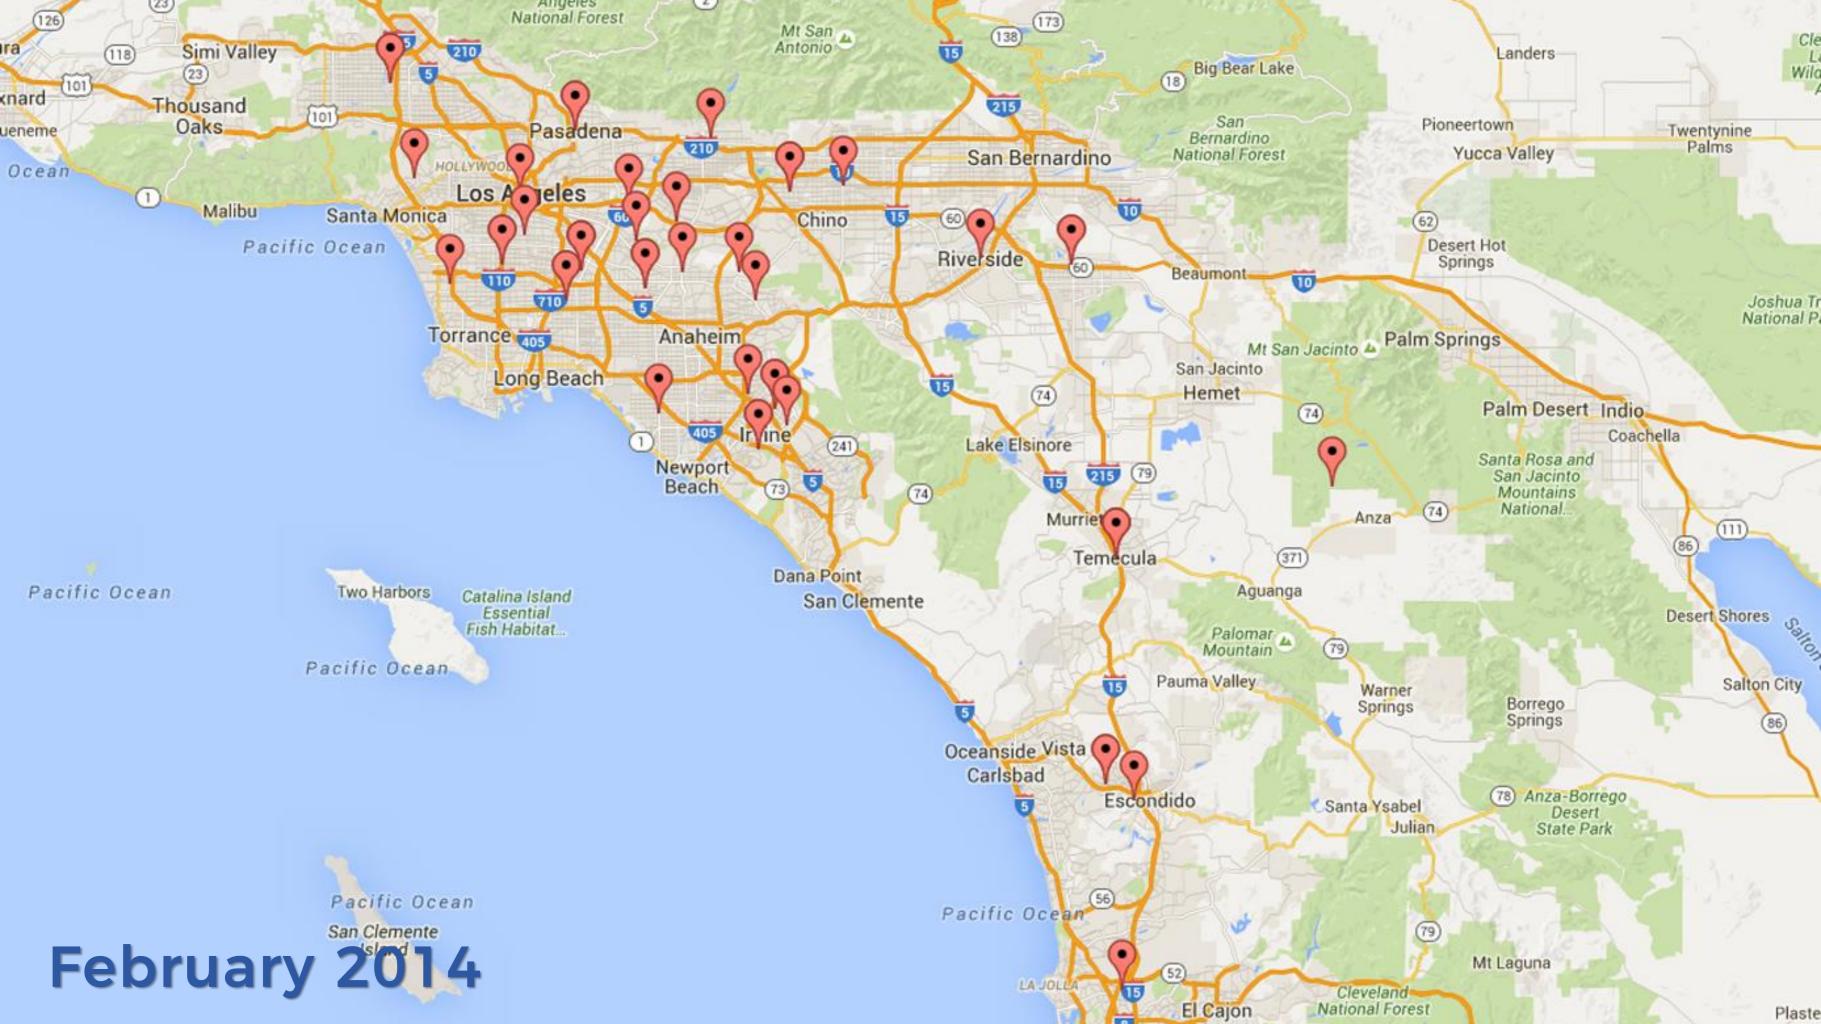

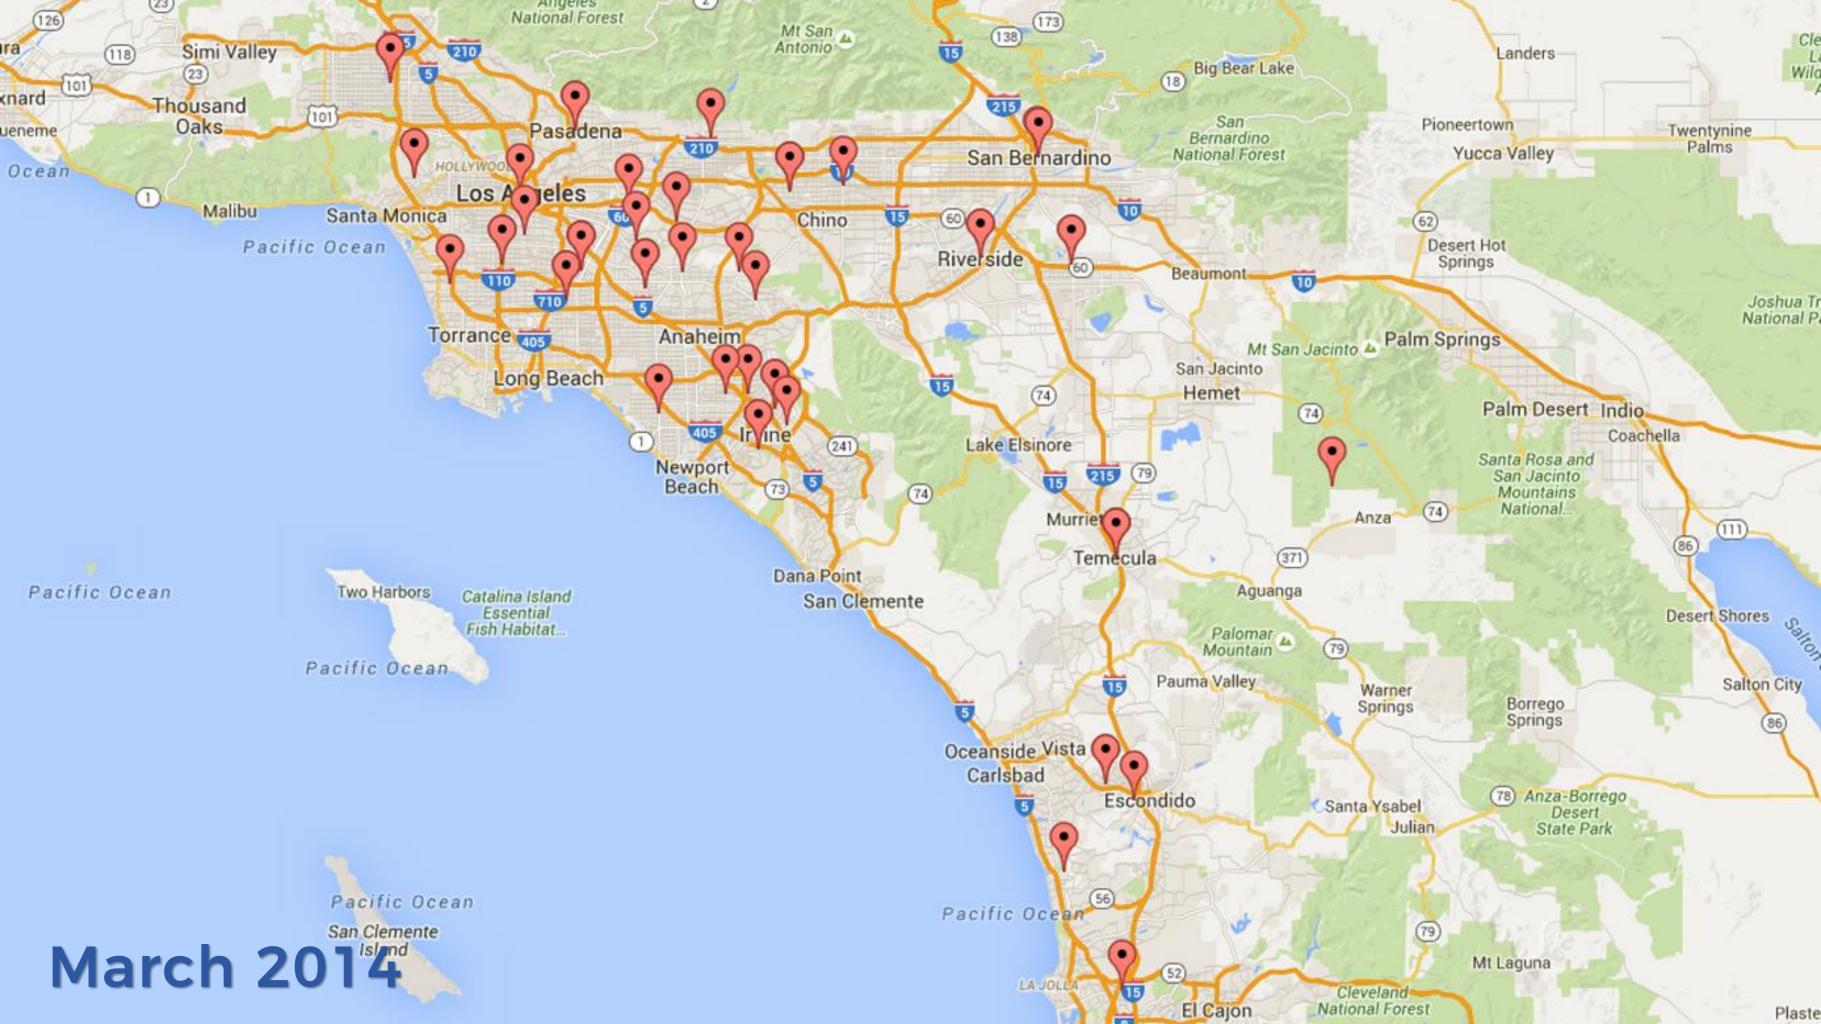

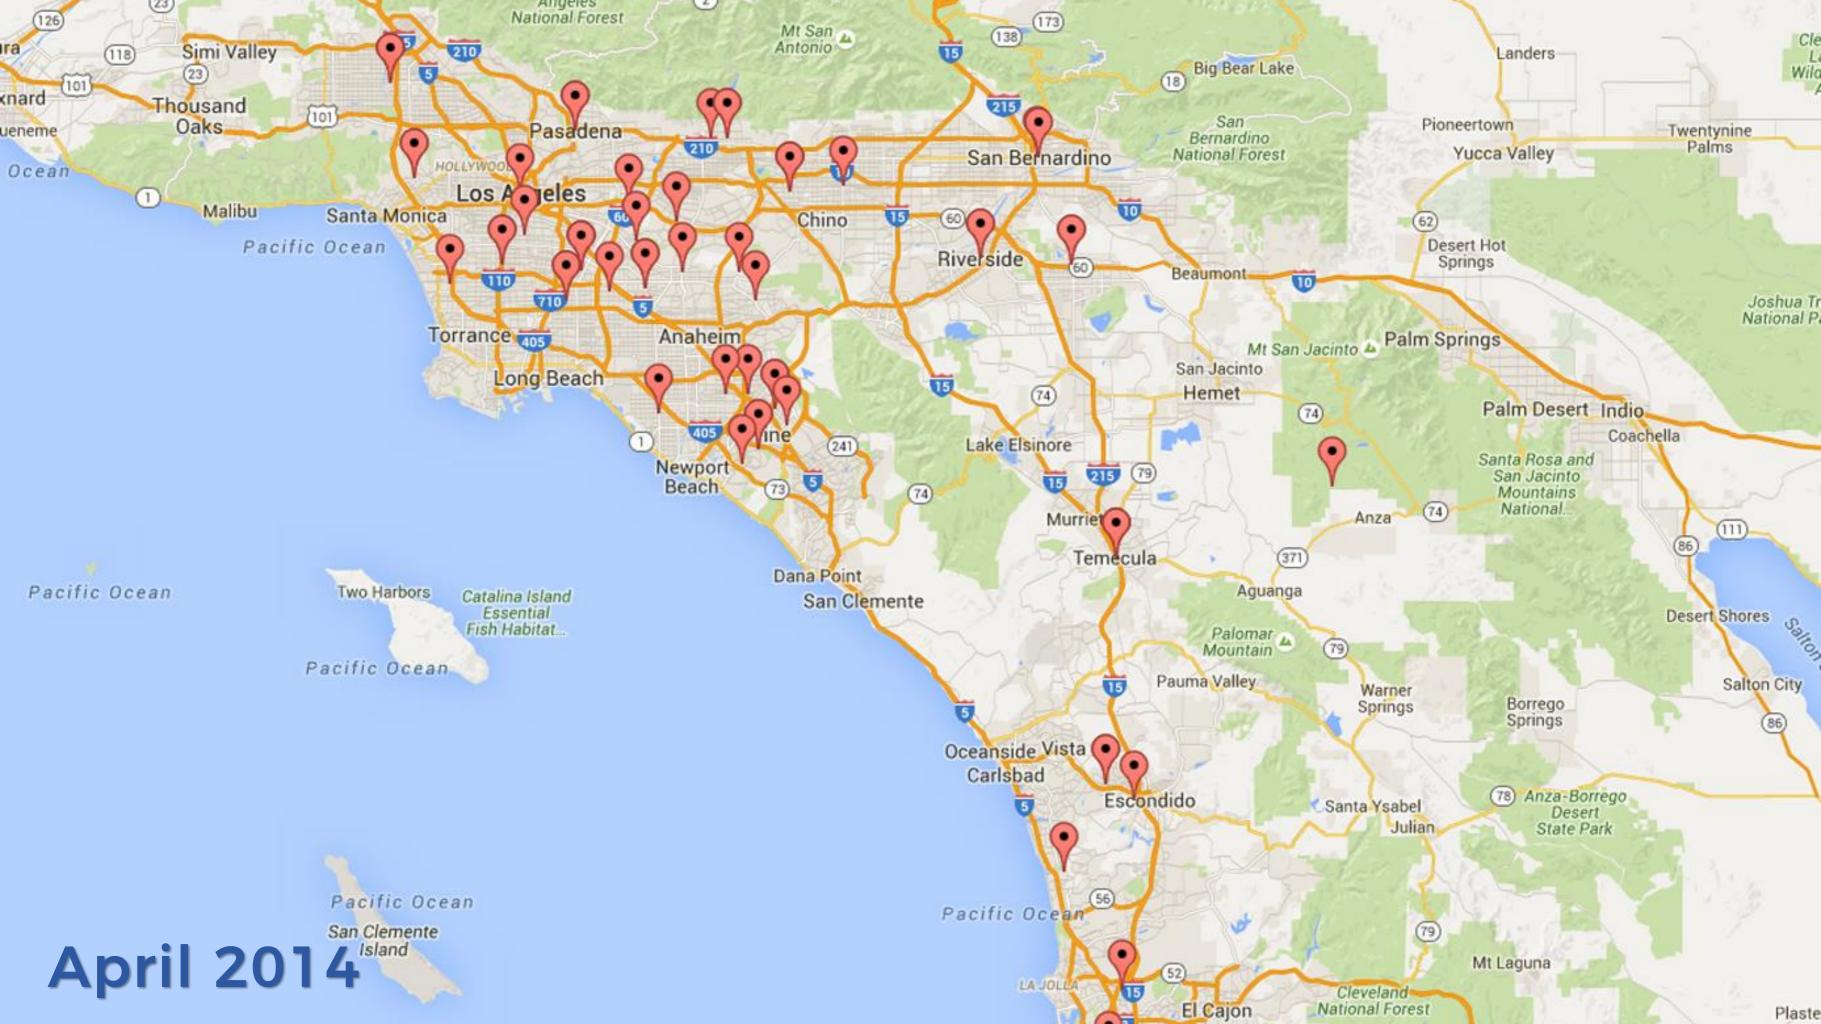

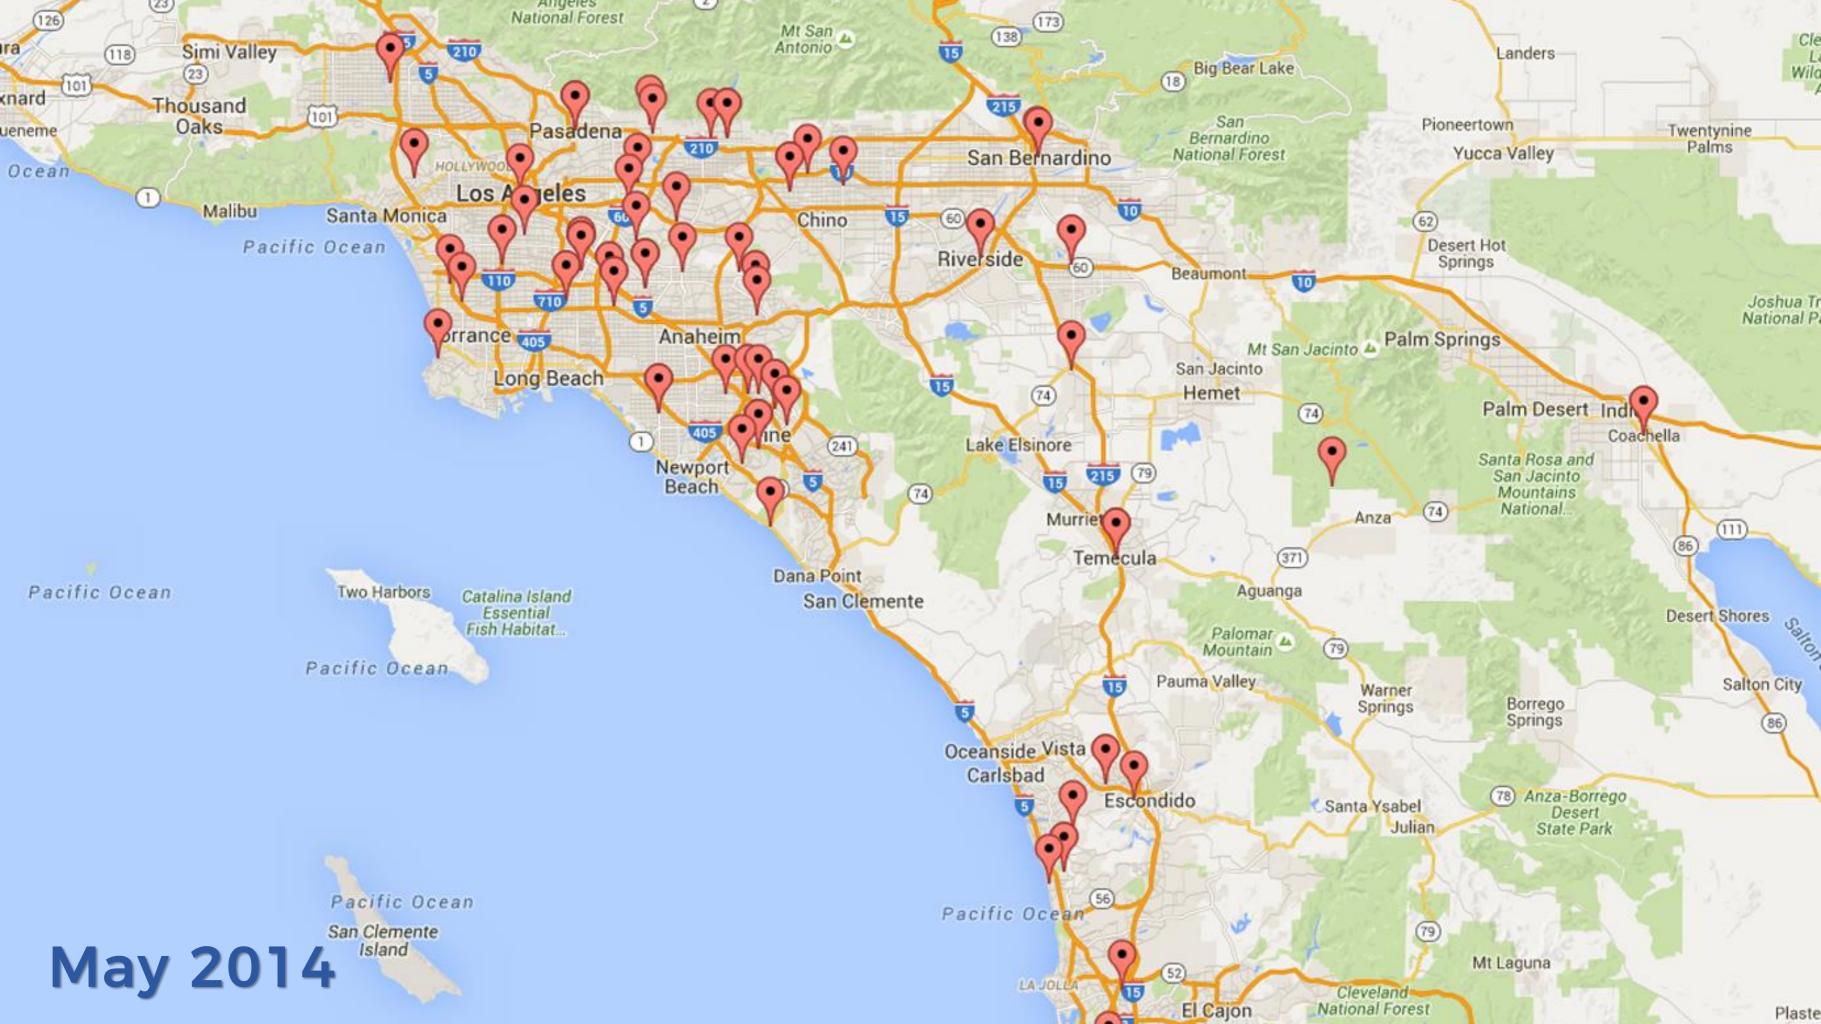

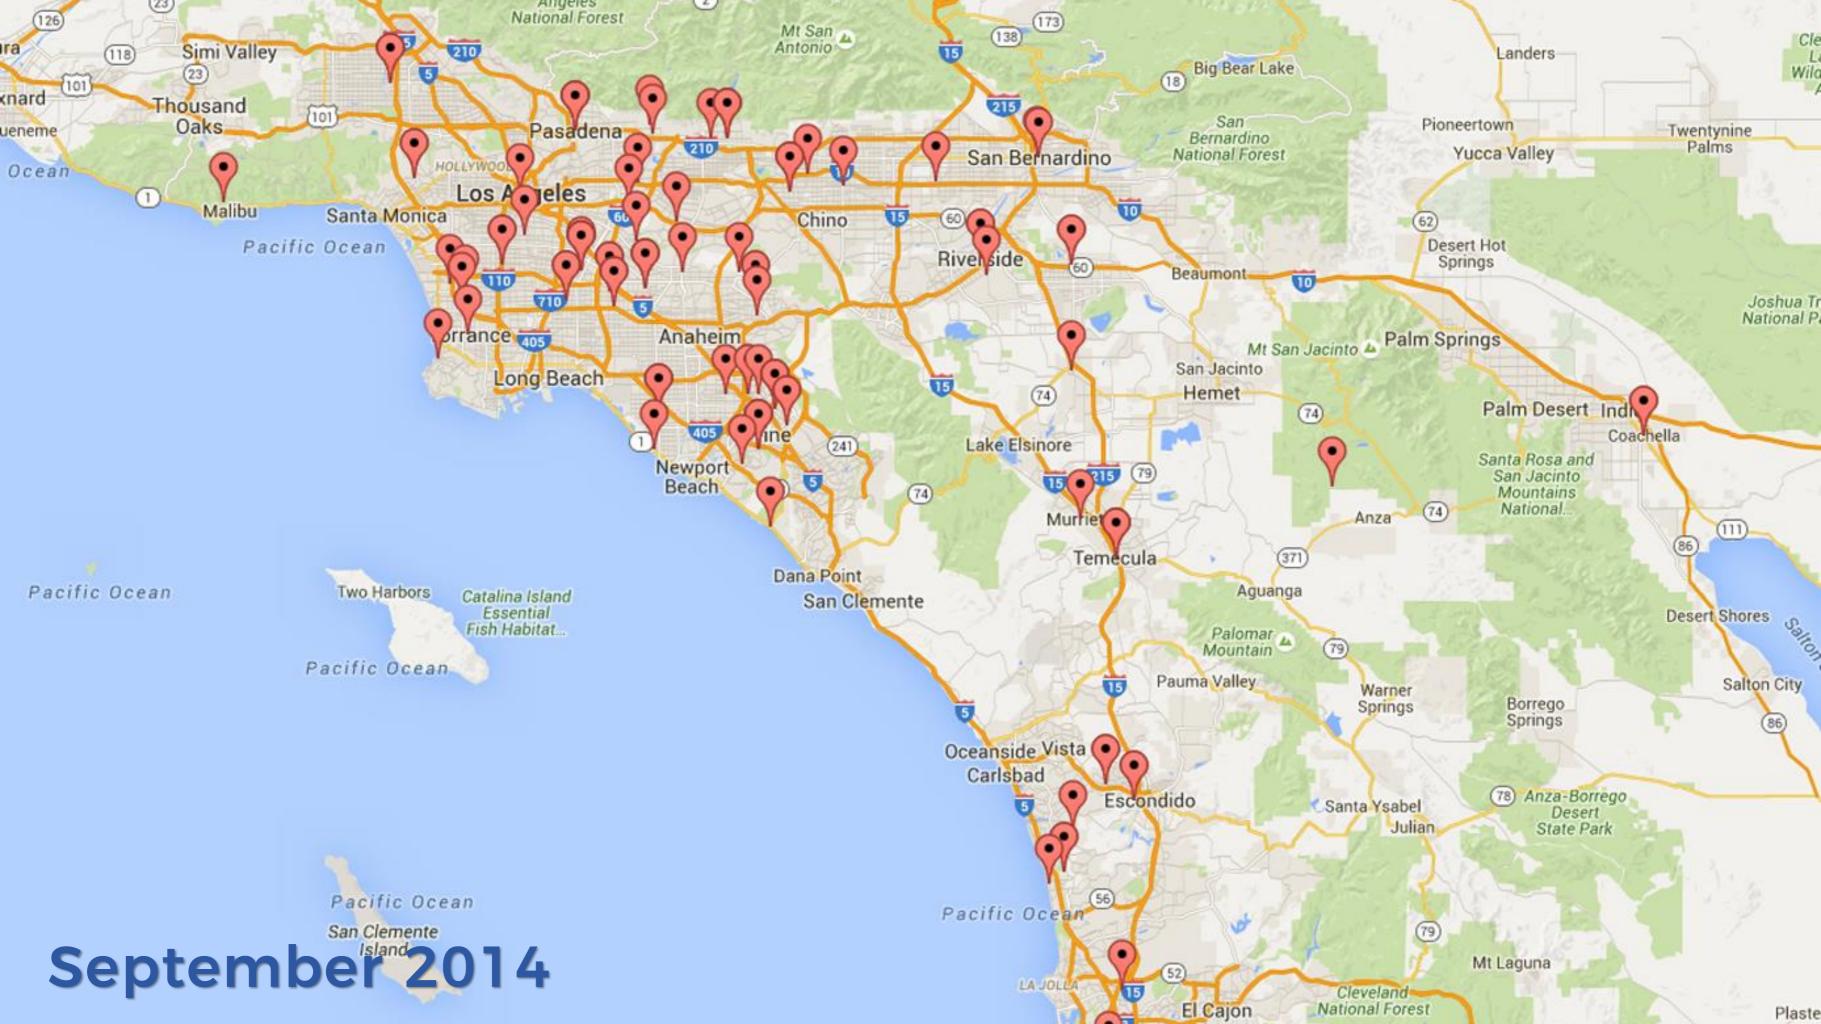

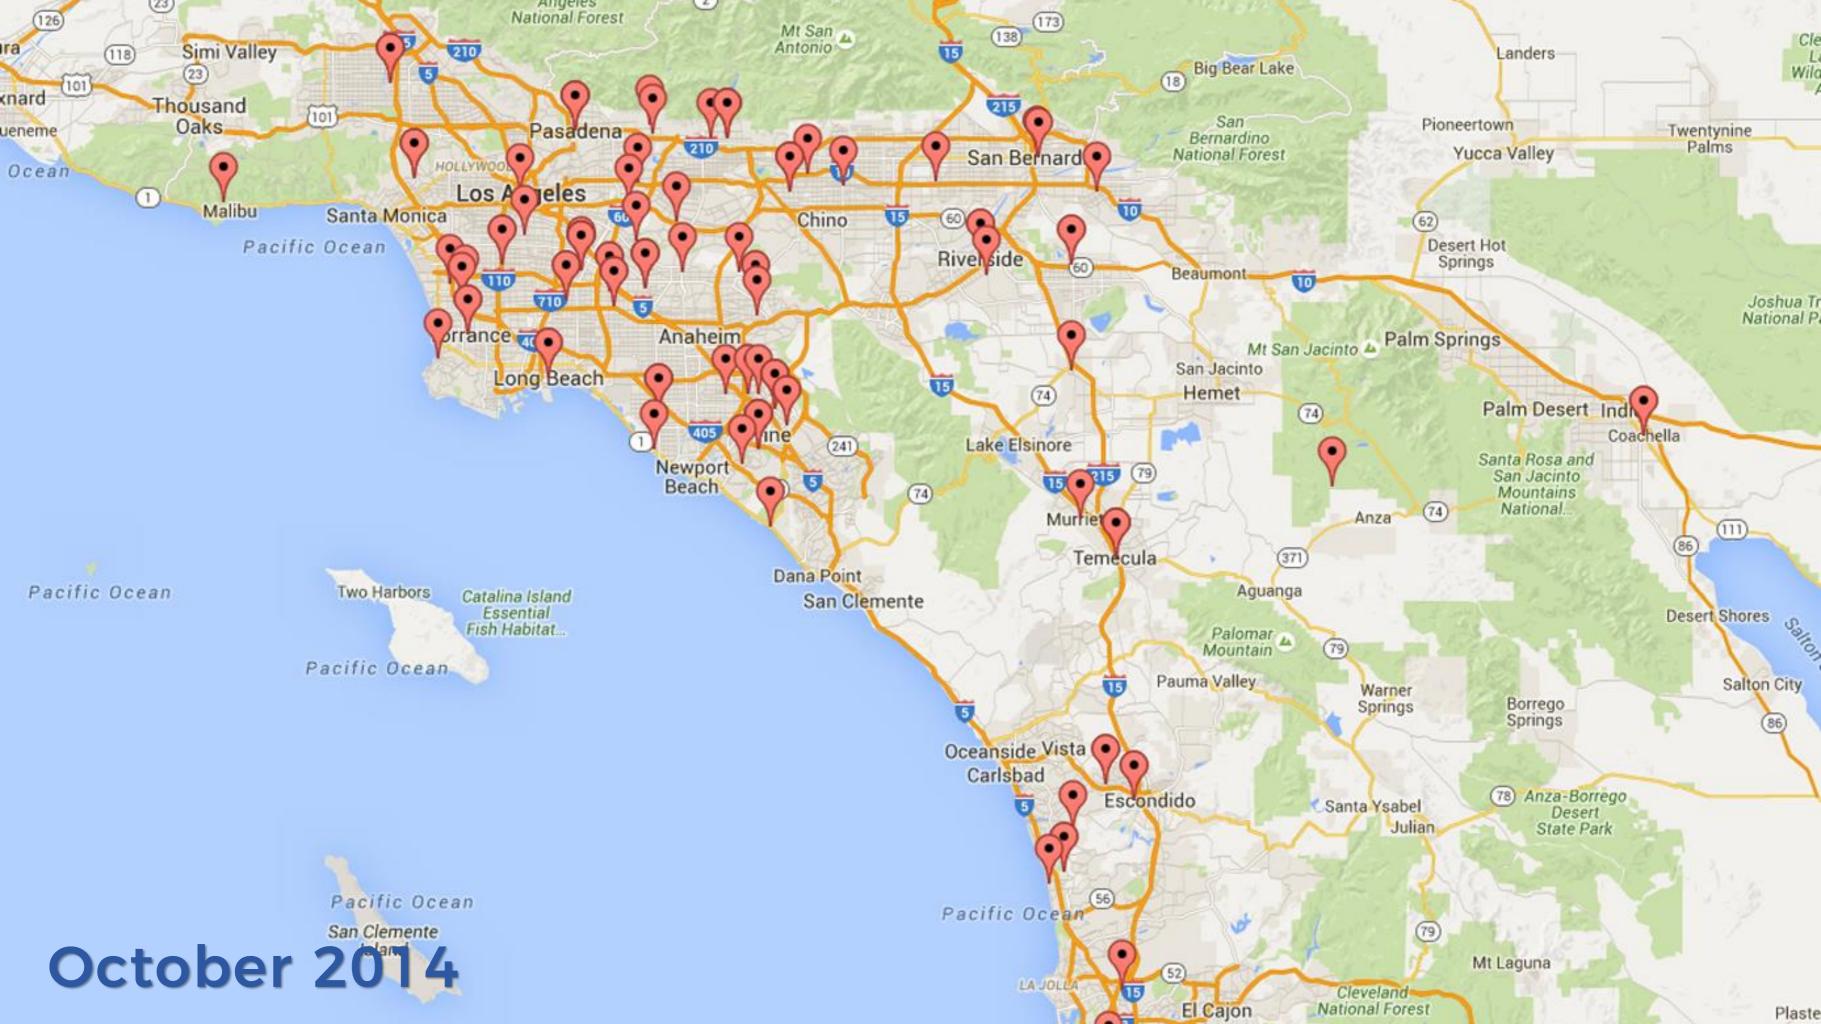

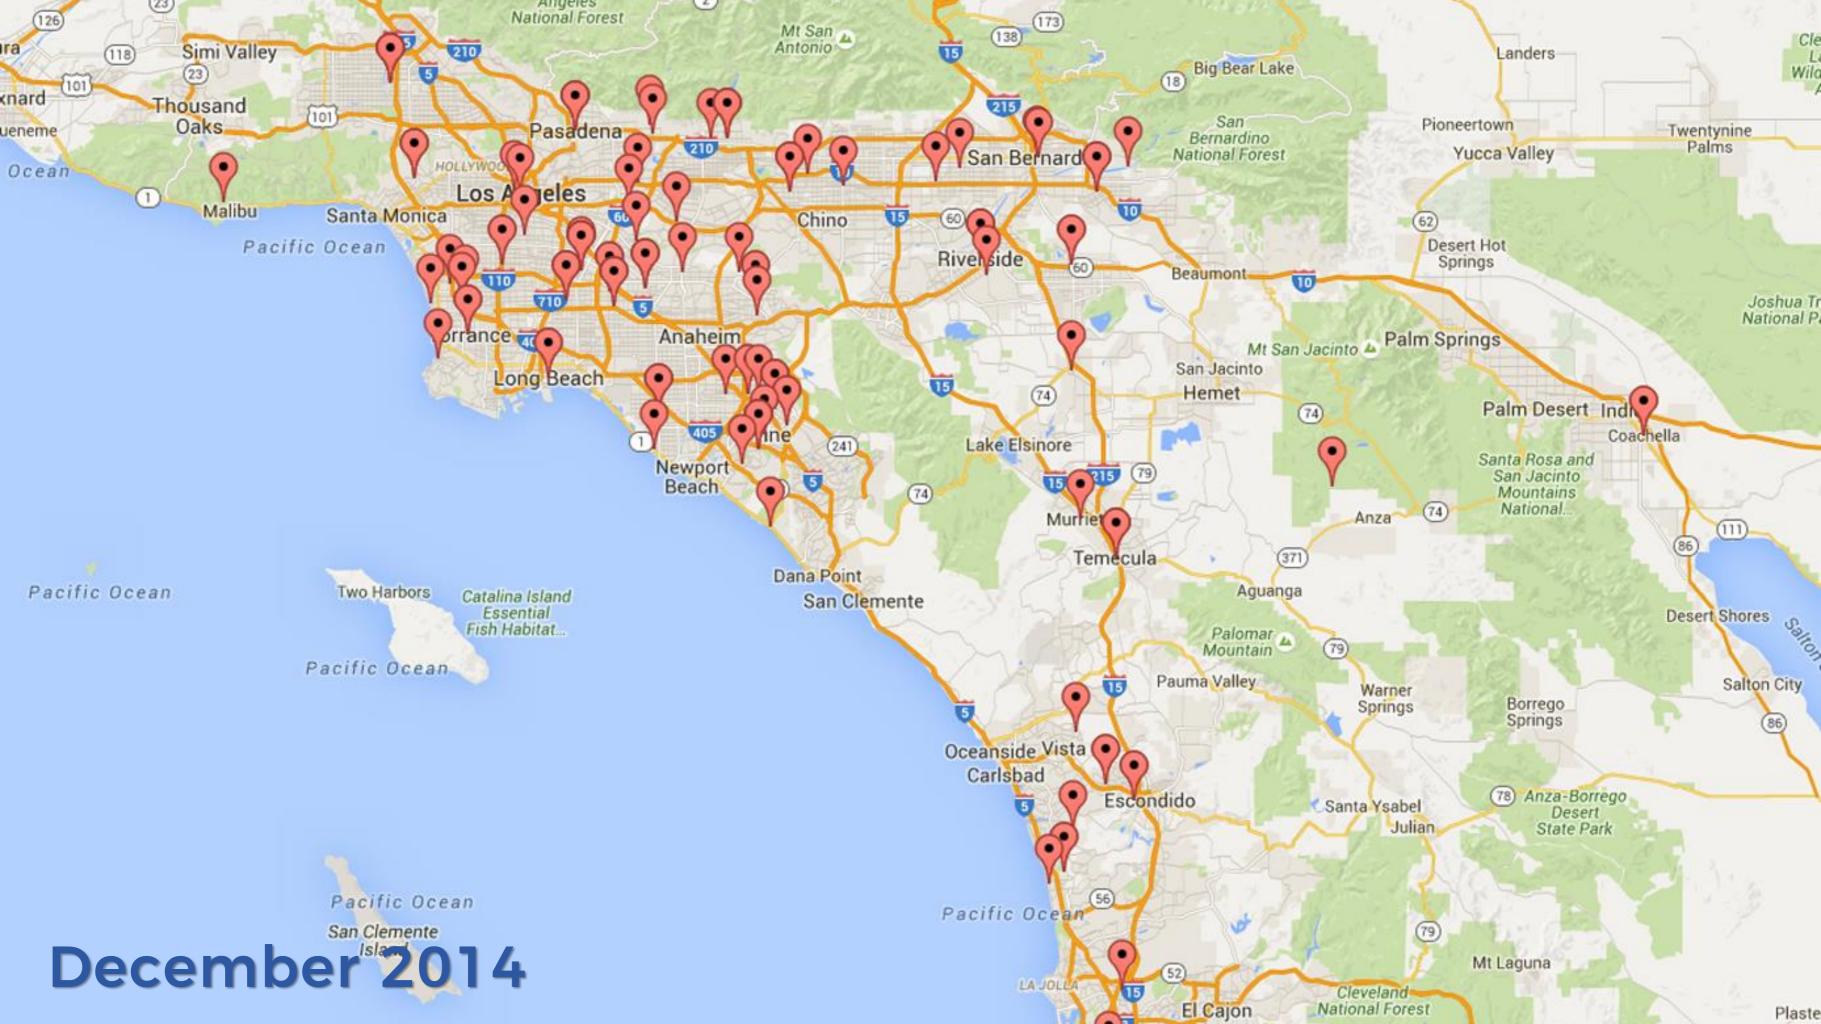

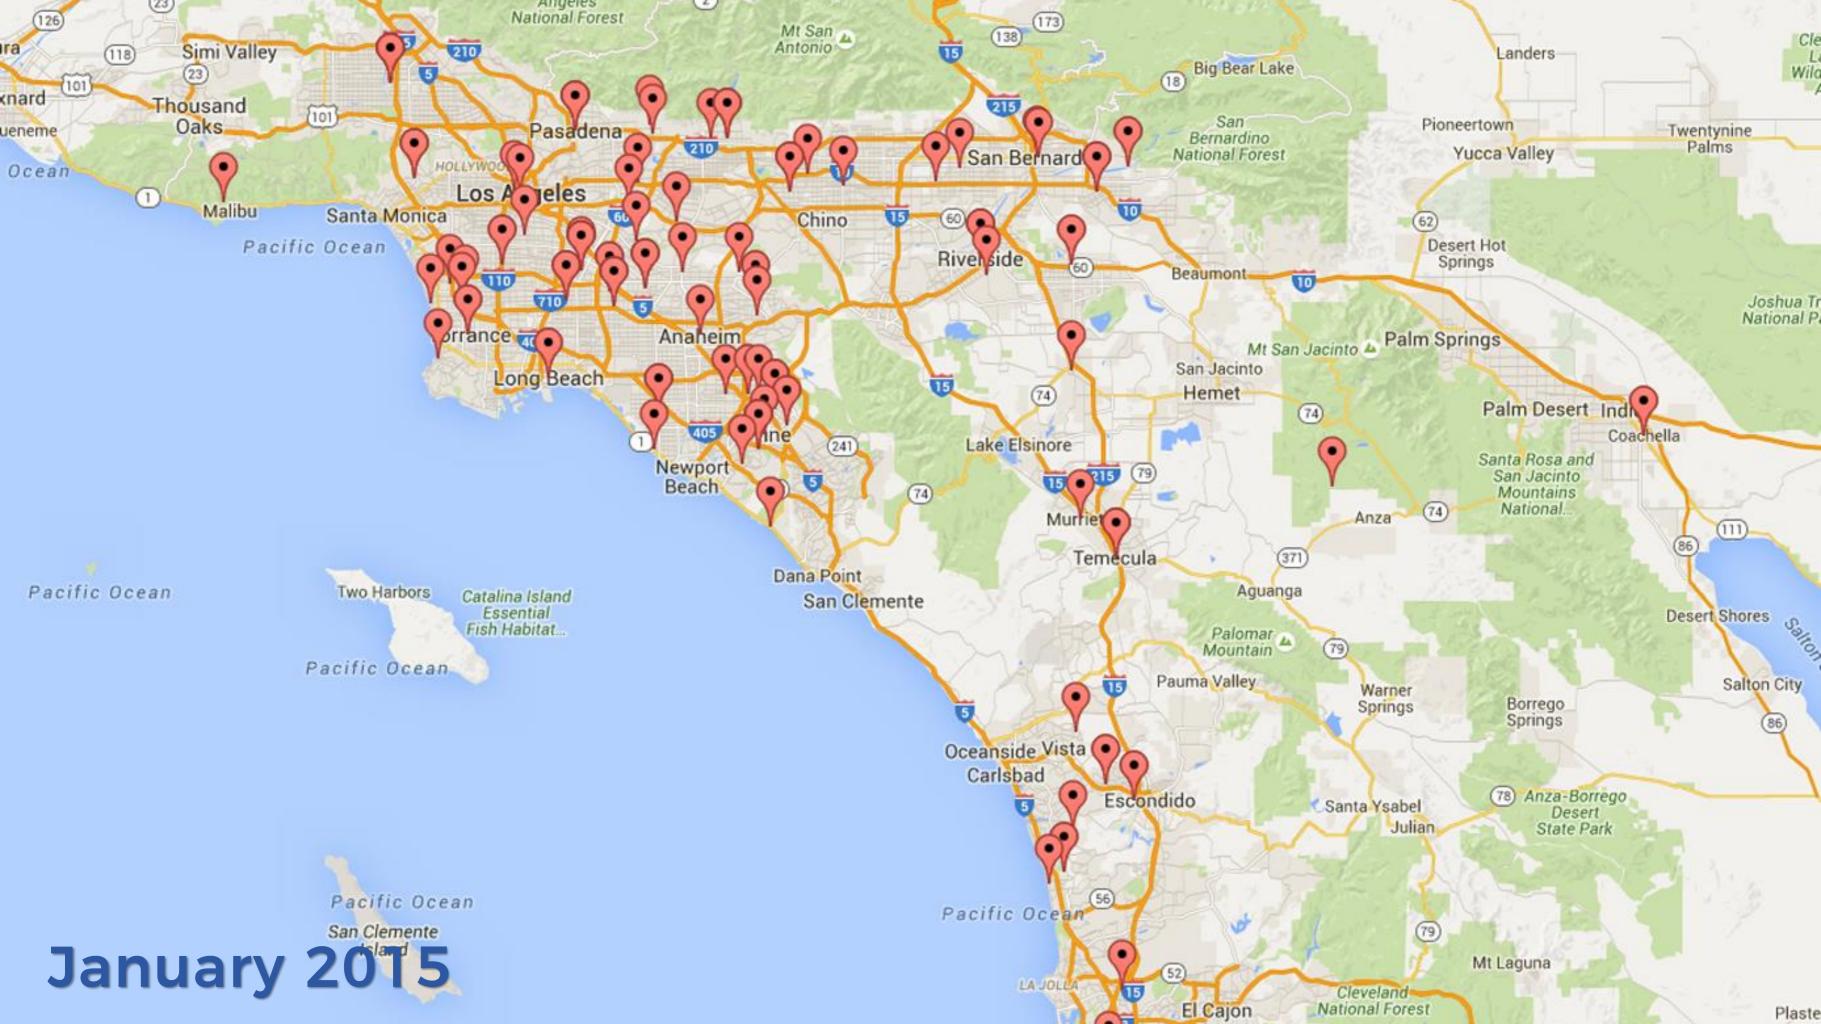

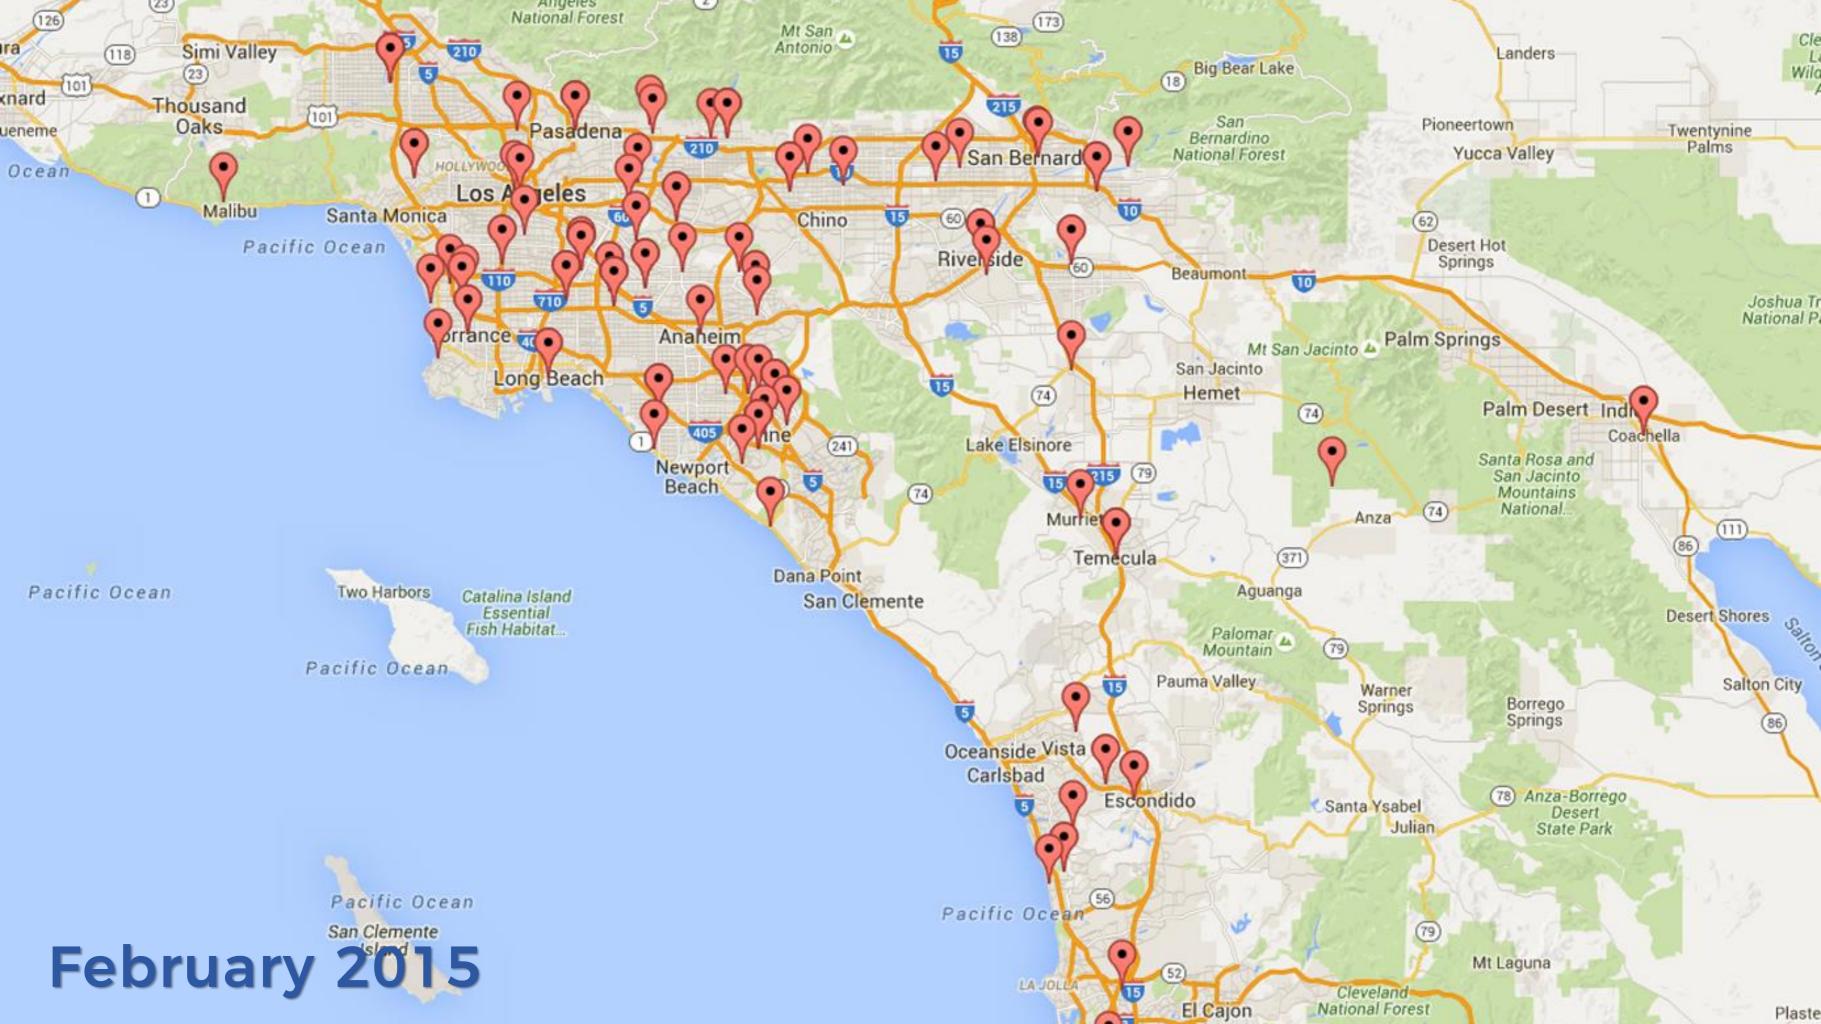

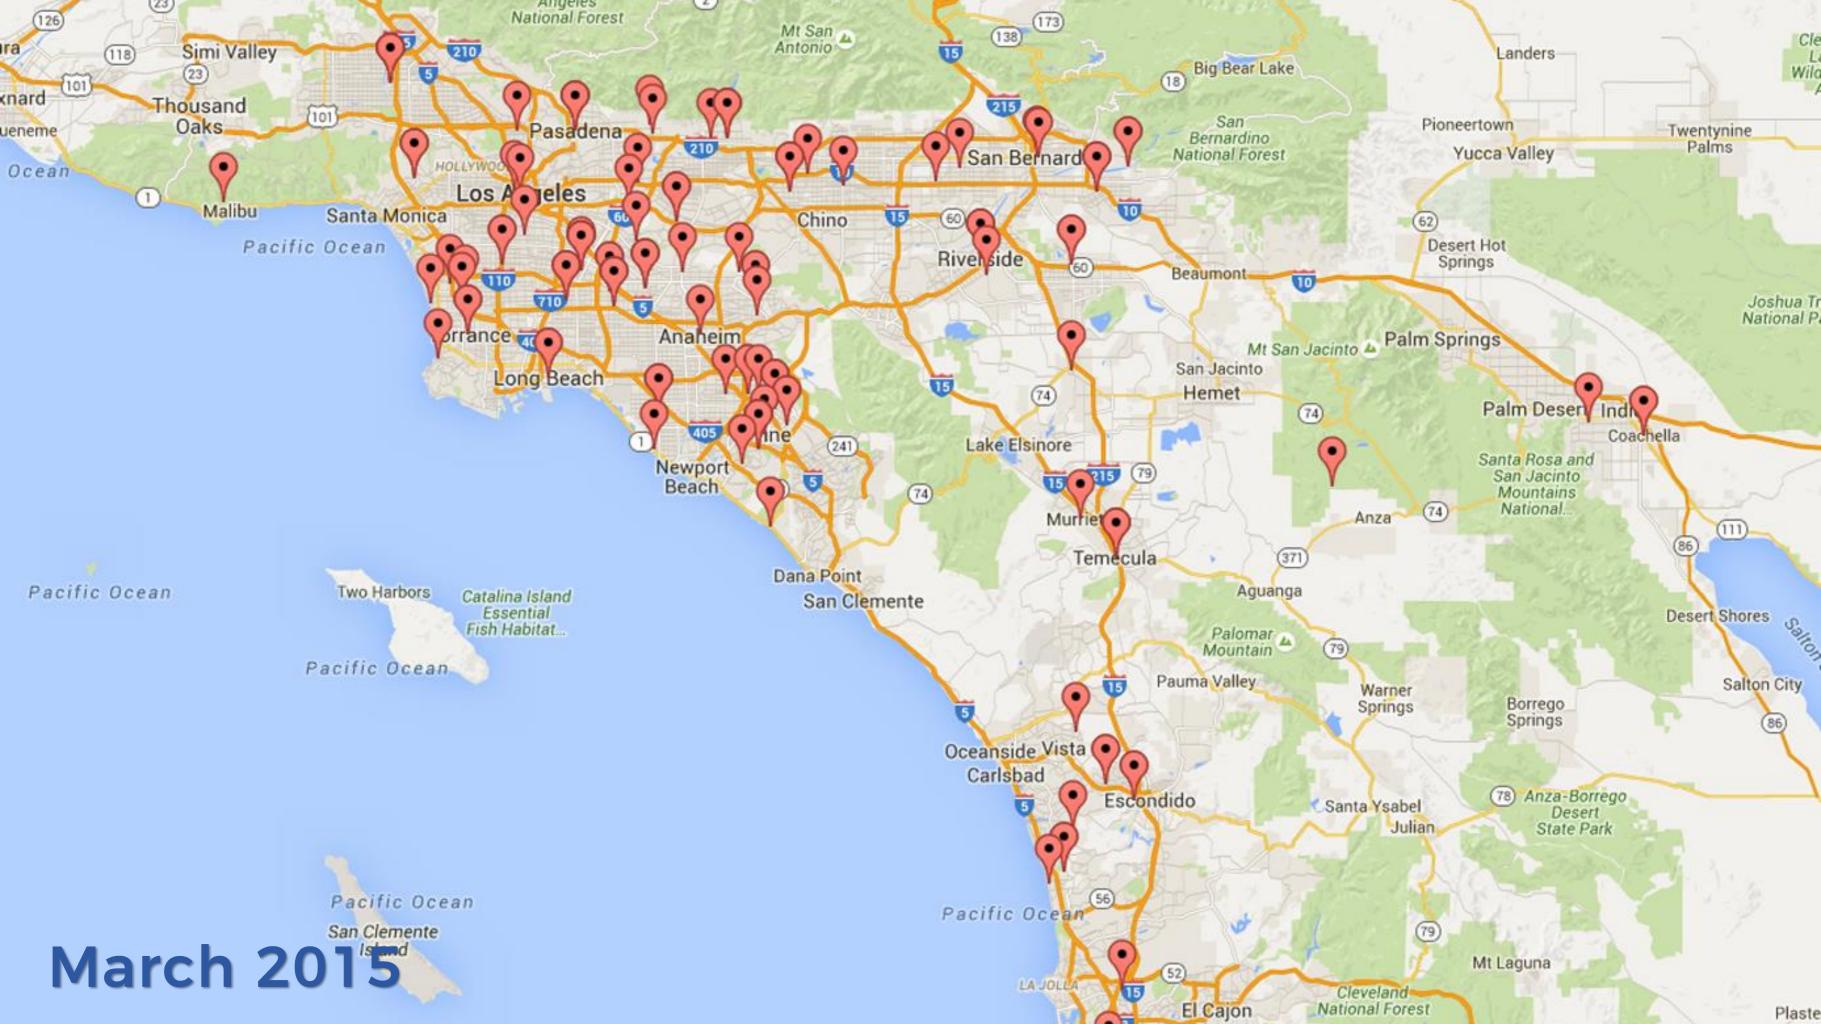

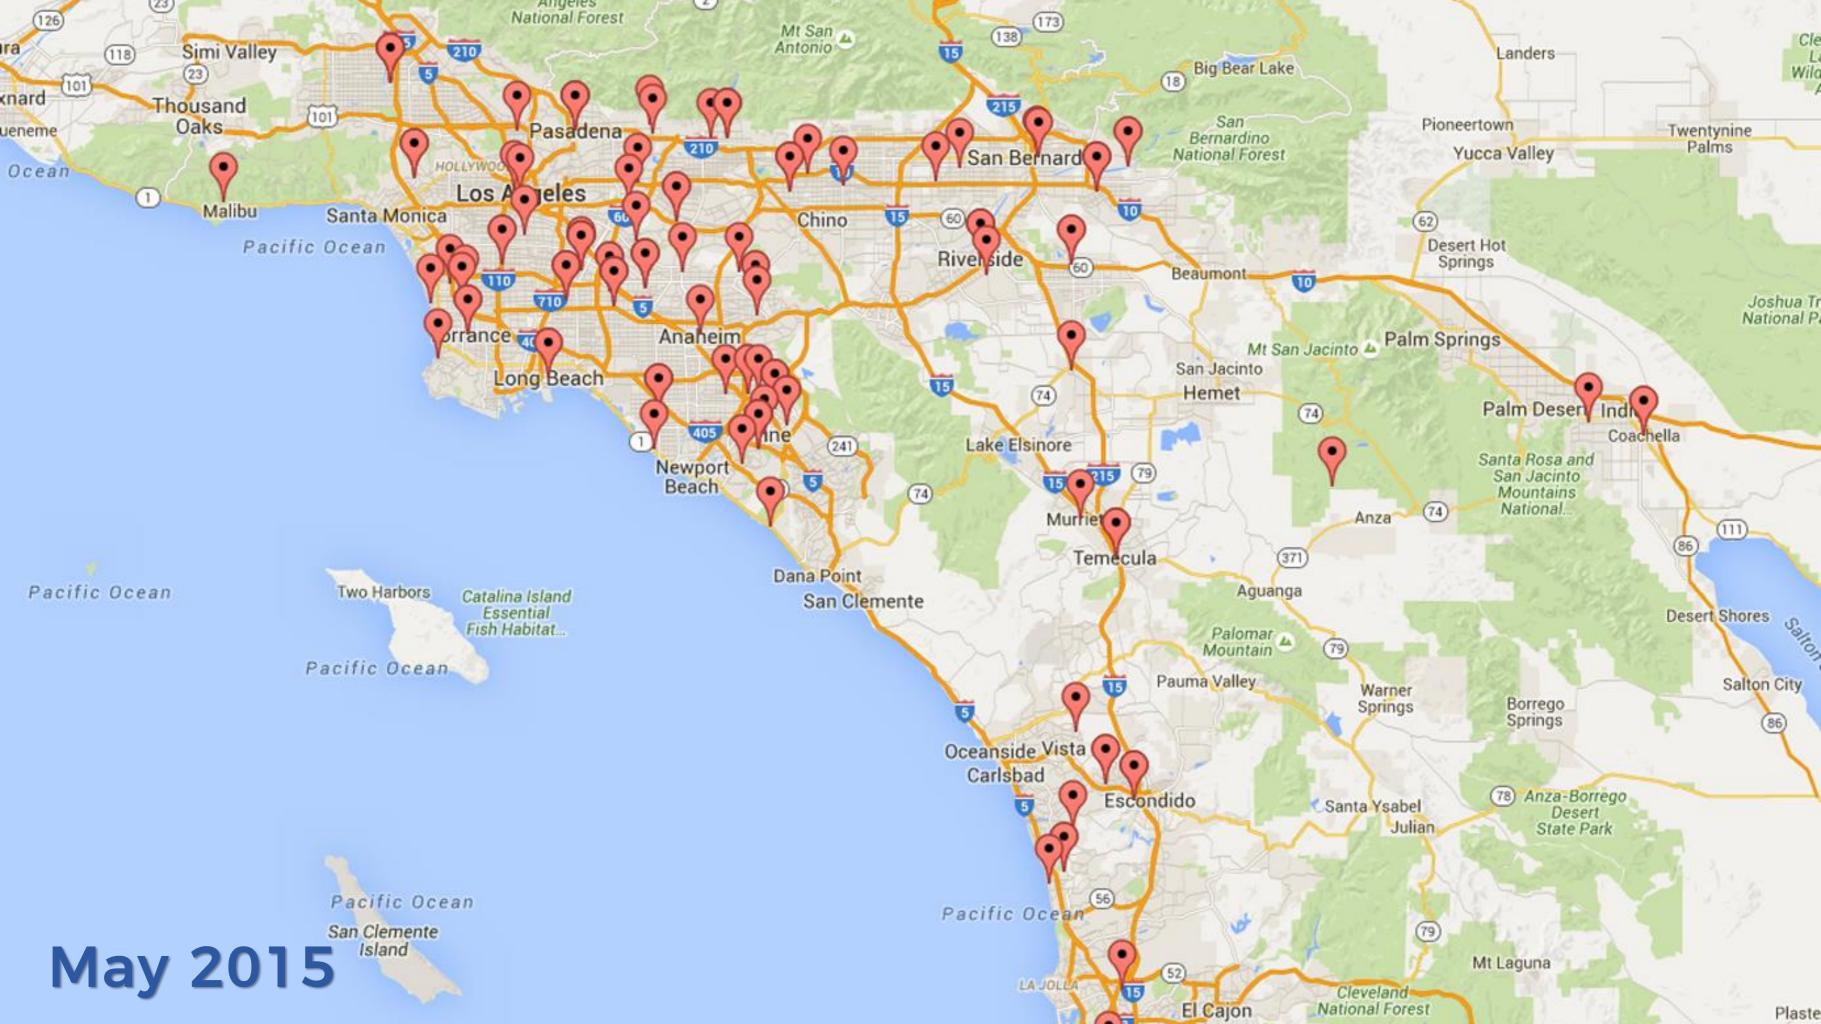

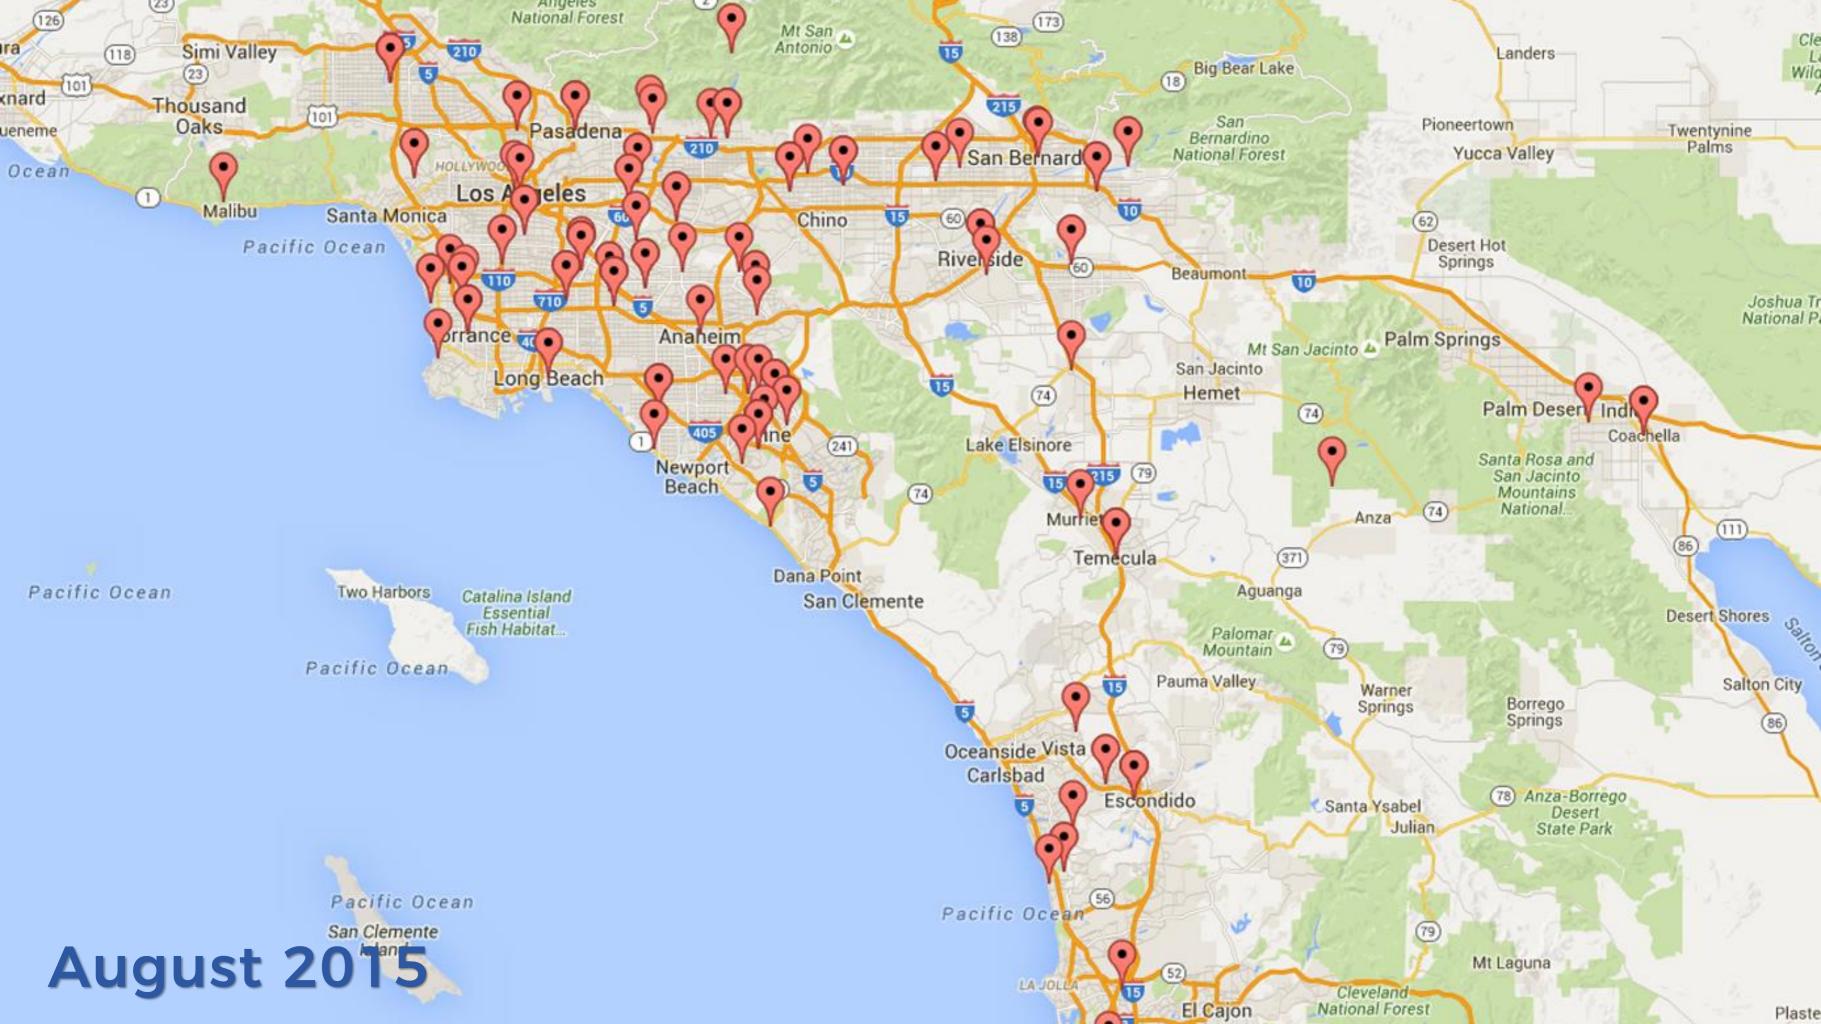

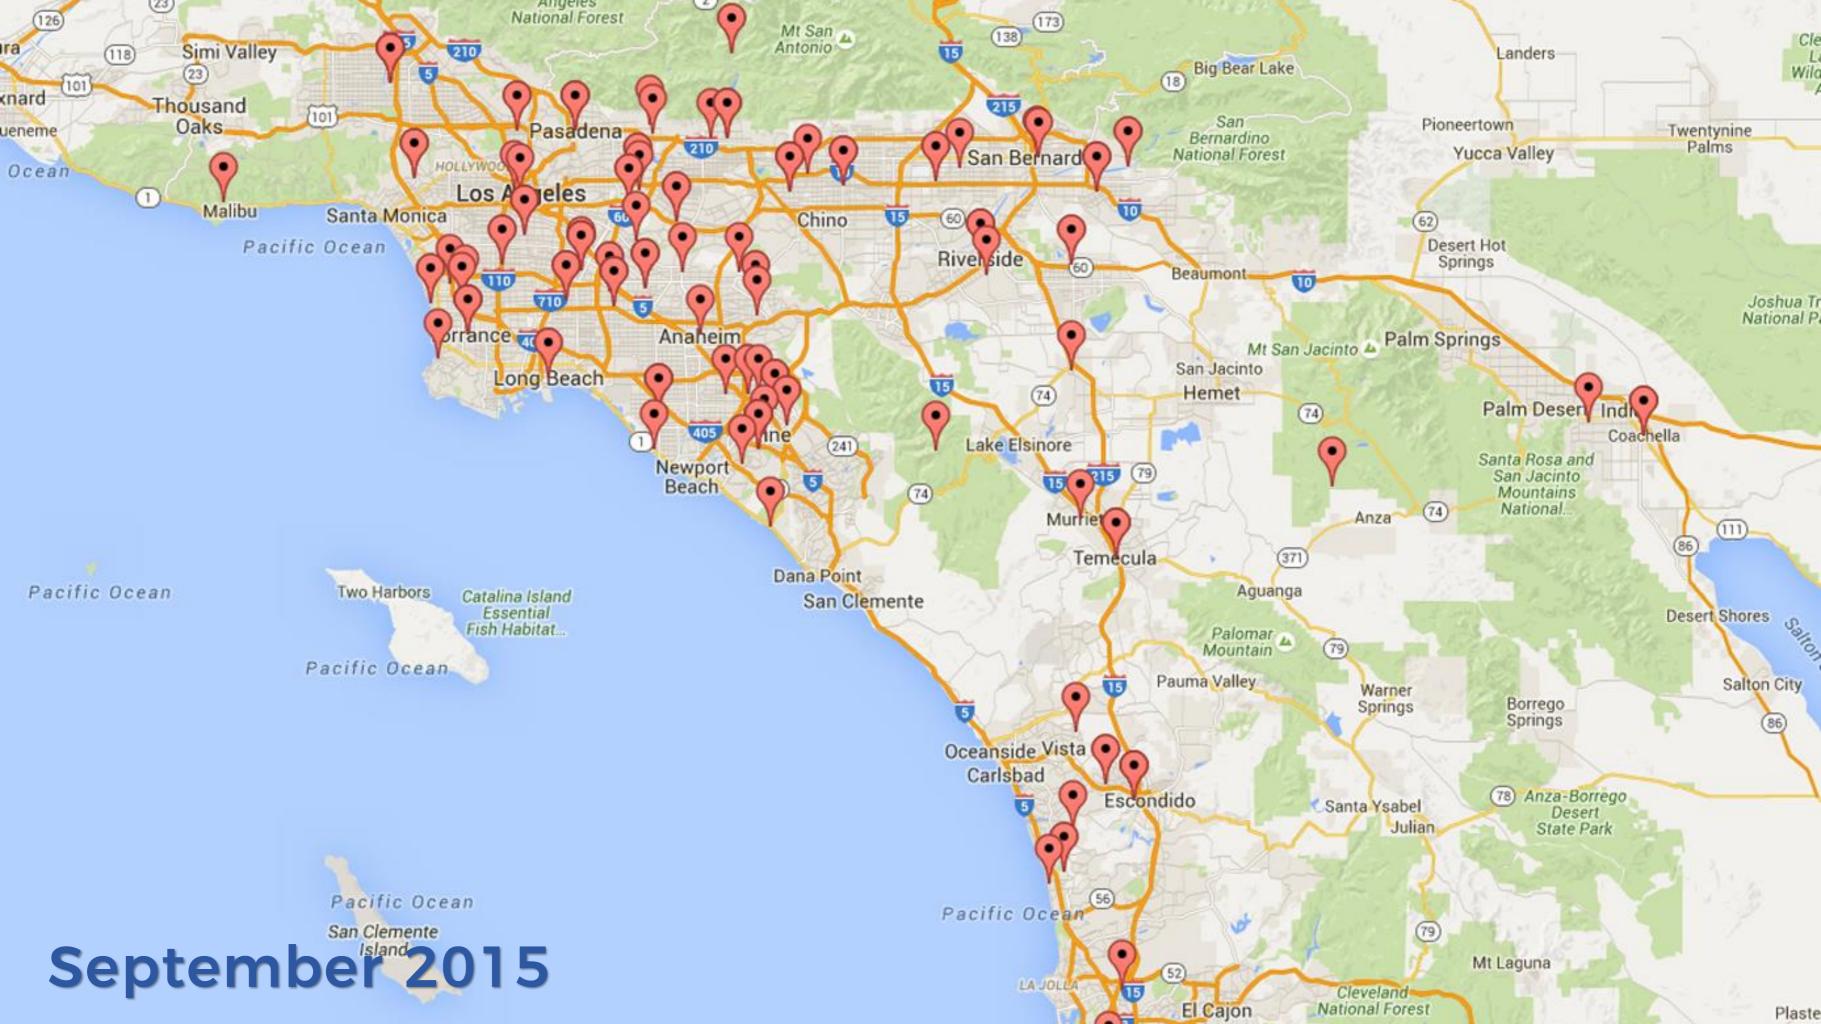

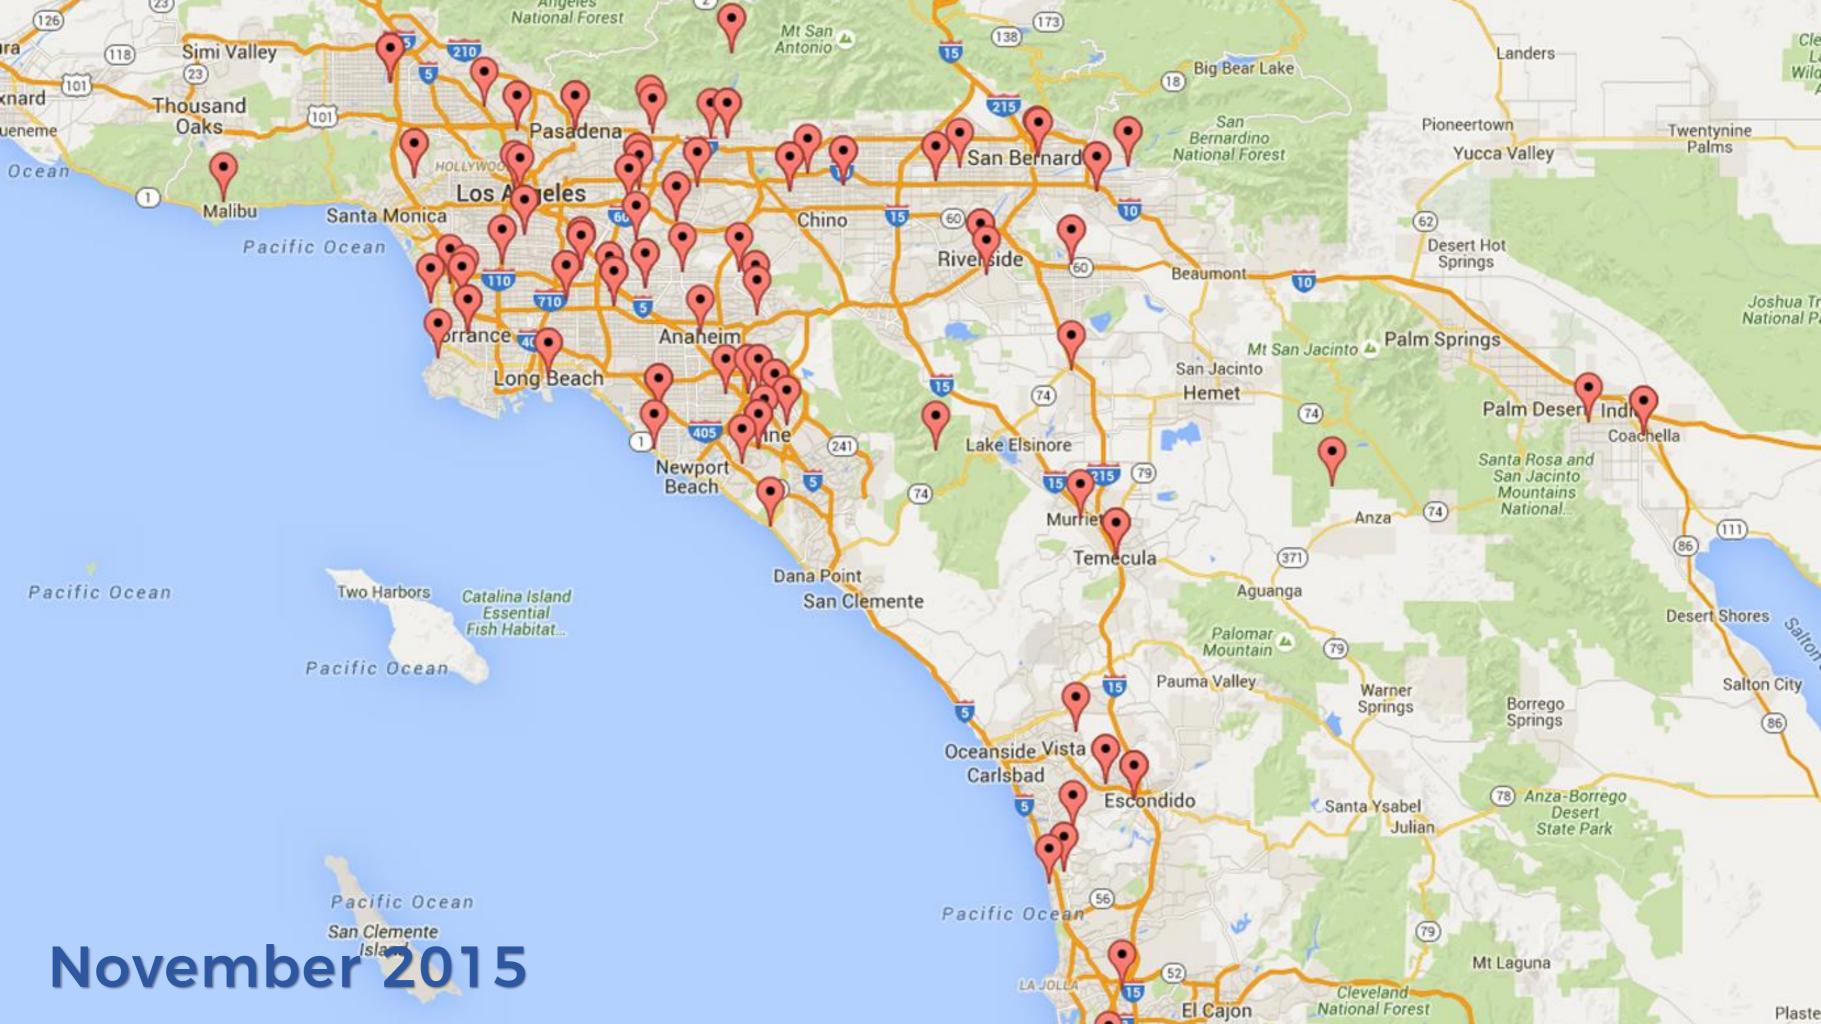

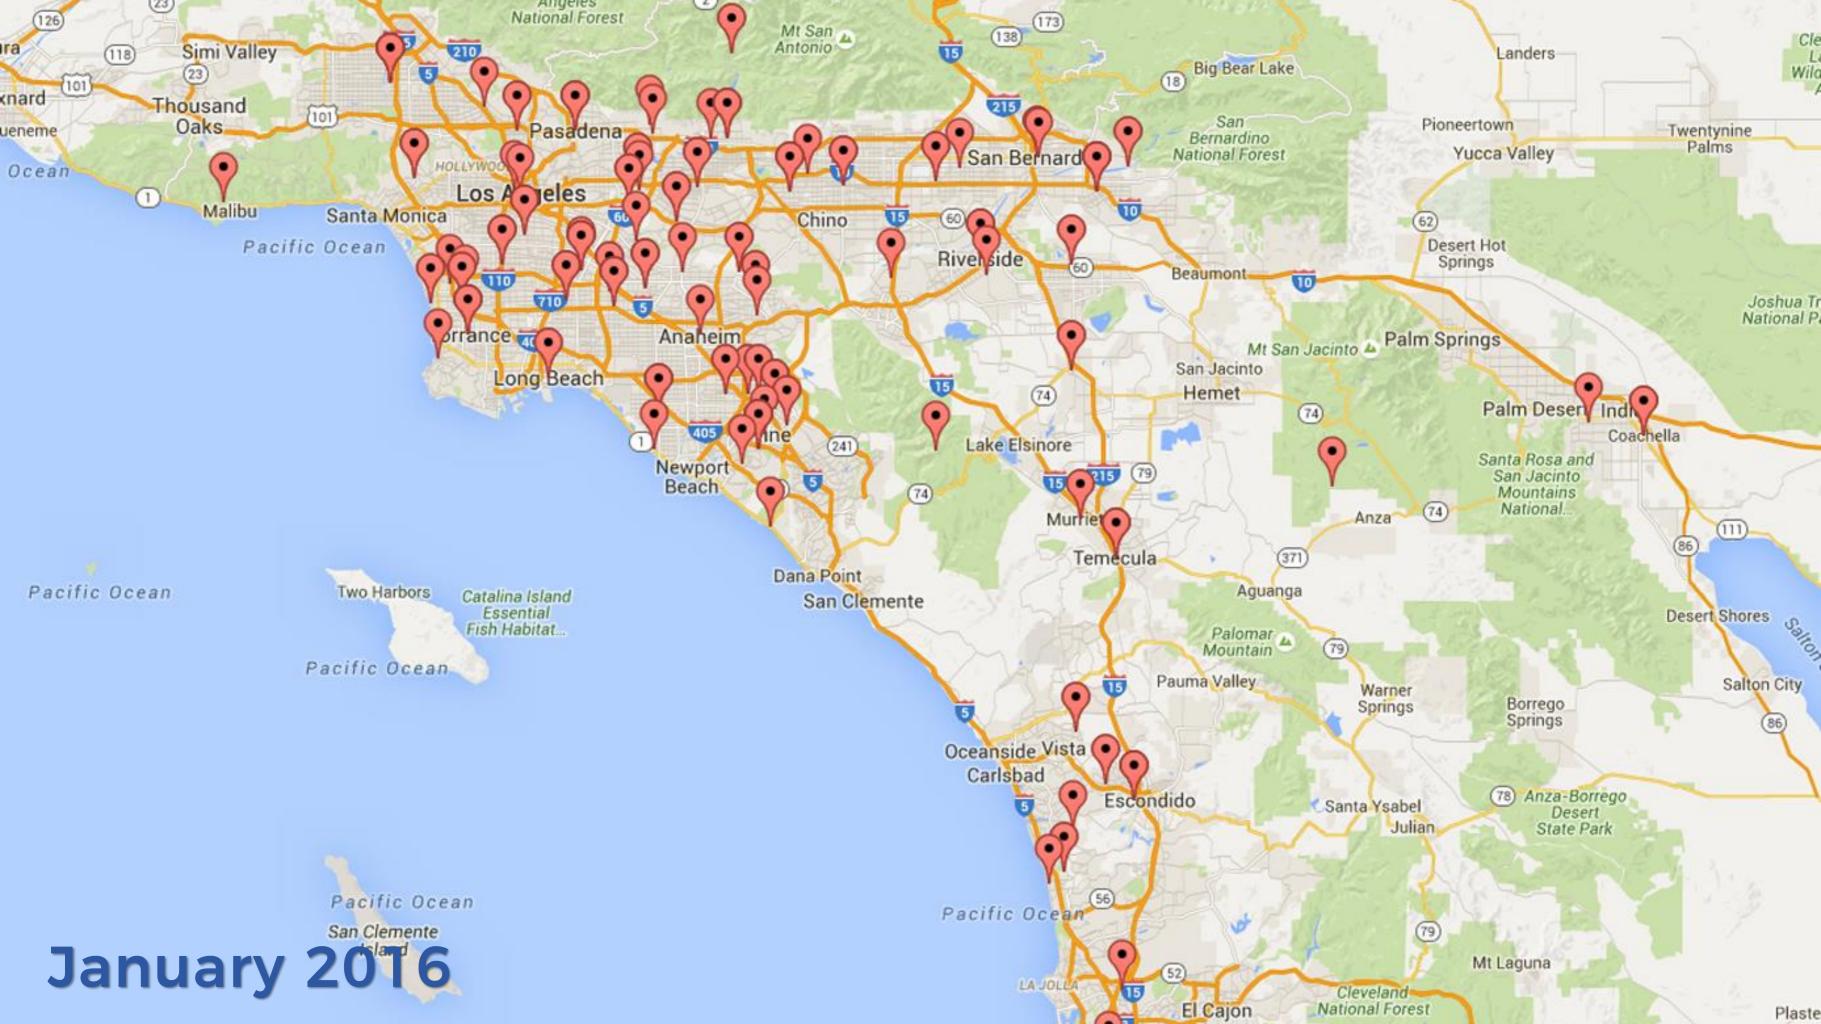

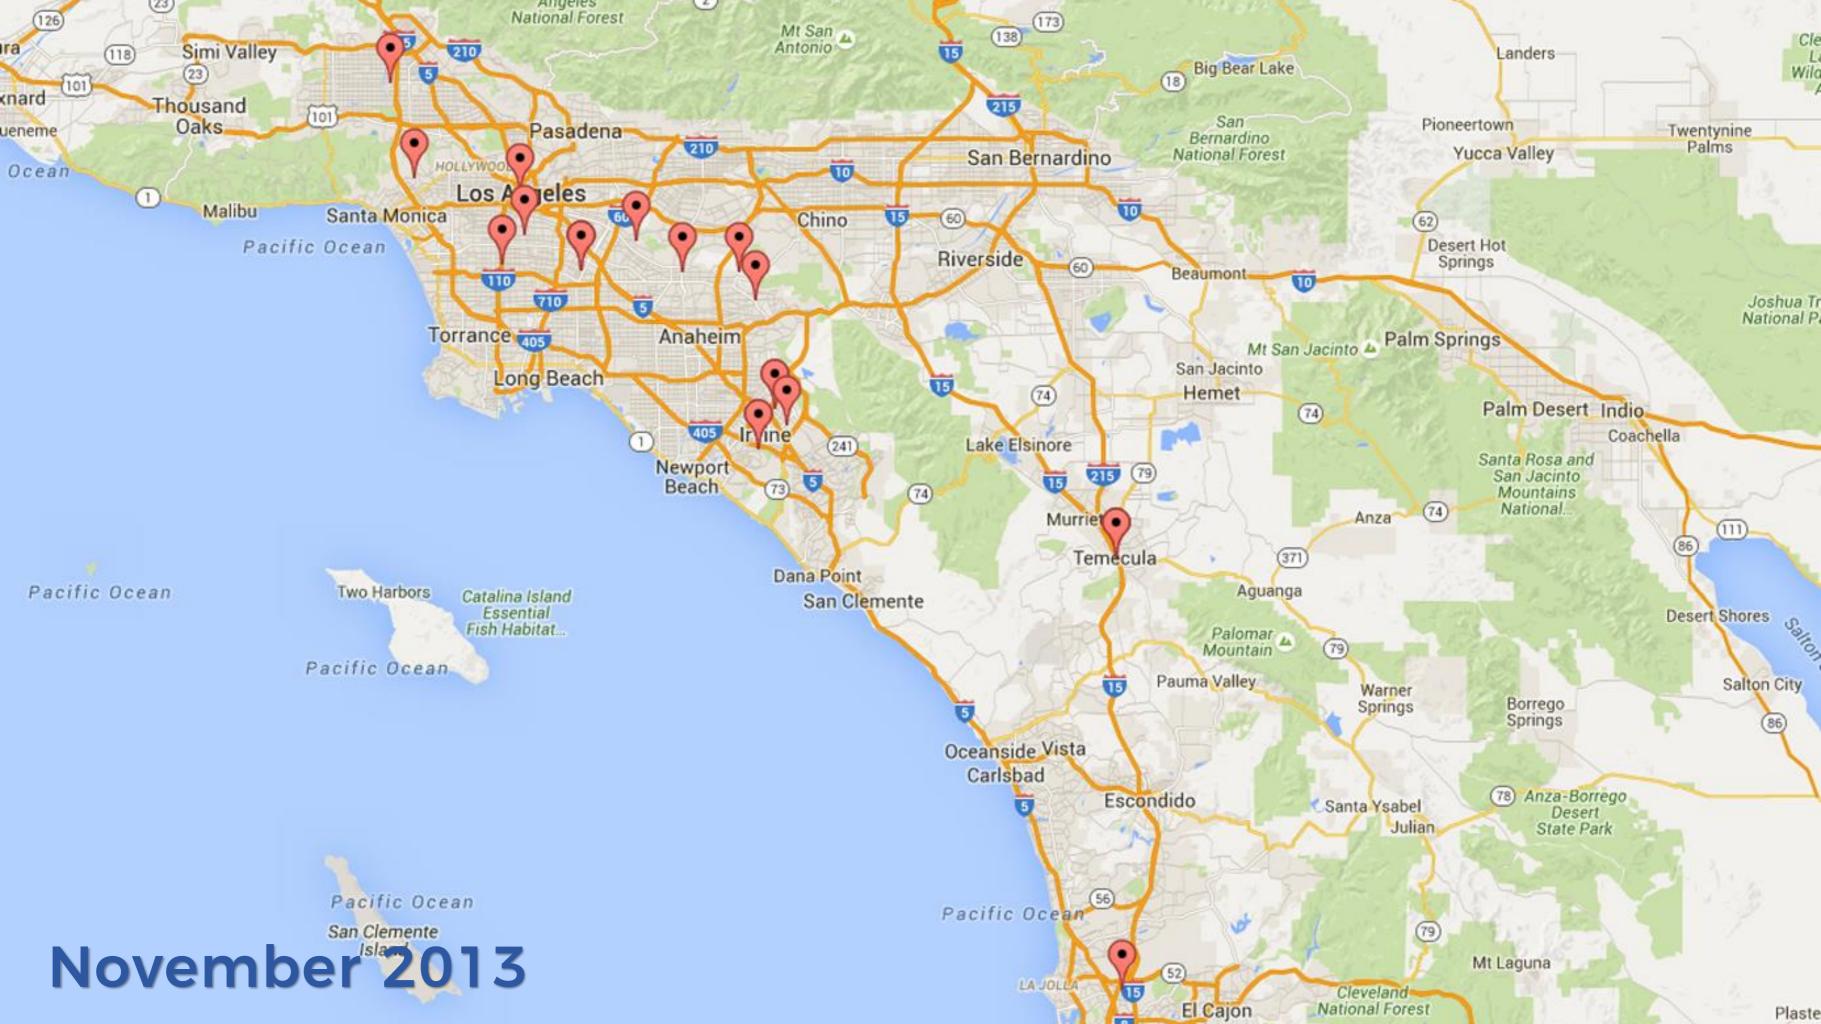

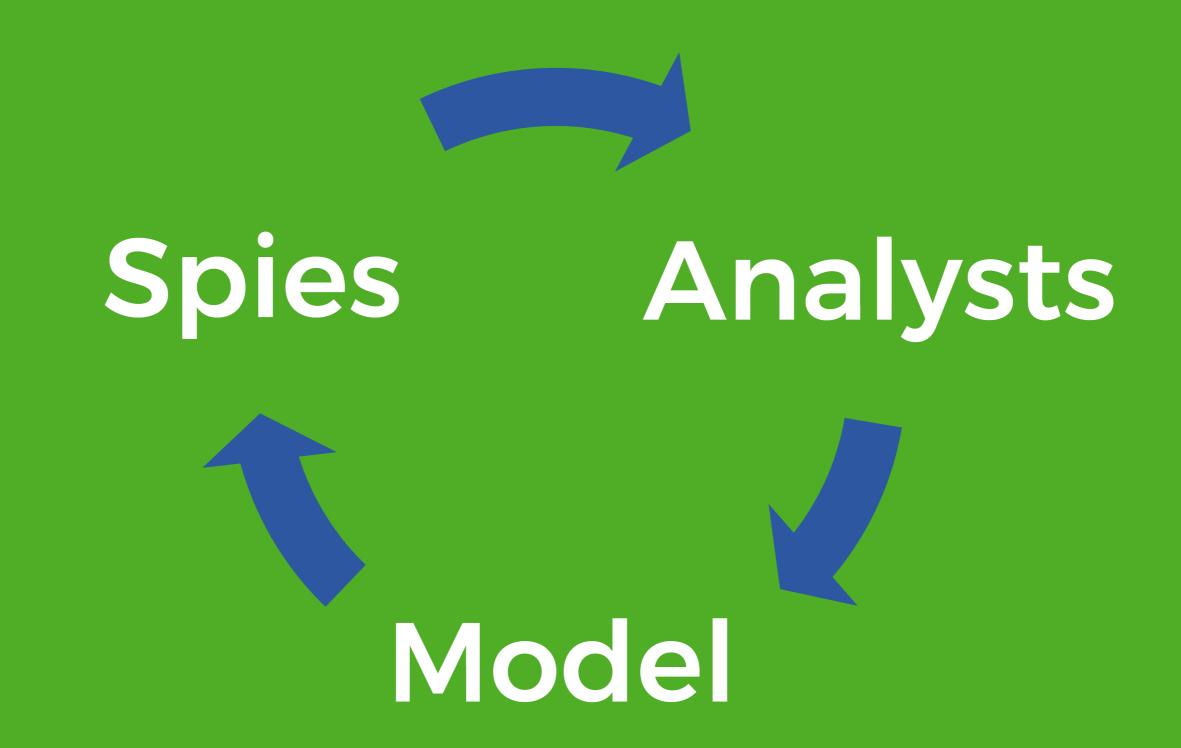

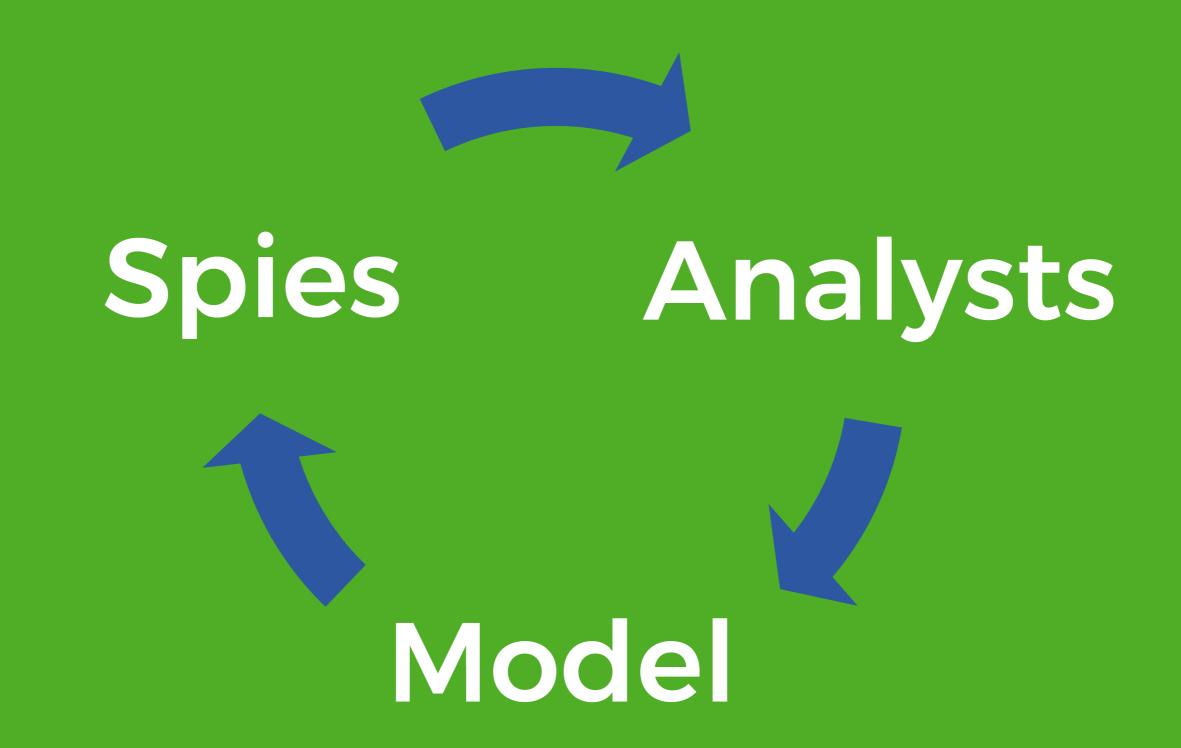

All models are wrong, but some are useful.

GEORGE E. P. BOX

Classic Mix 20 Singles

LAY'S® Classic Potato Chips, DORITOS® Nacho Cheese Flavored Tortilla Chips, DORITOS® COOL RANCH® Flavored Tortilla Chips, CHEETOS® Crunchy Cheese Flavored Snacks, SUNCHIPS® Original Multigrain Snacks, FRITOS® Original Com Chips (All 1 OZ. Each)

EASY TO STORE.

20 INDIVIDUAL BAGS: 1 OZ, EACH, TOTAL NET WT. 20 OZ. (1 LB. 4 OZ.) 567 g & WARNING: PREVENT ENTANGLEMENT AND STRANGULATION. KEEP

Hey #MTBoS, can you do me a favor and complete this 3 question anonymous survey about your favorite chips? I need data for a presentation. Please RT.

goo.gl/forms/etPtujll... #iteachmath

Favorite Chips

Please complete this anonymous survey. I'll be using this data in a presentation.

THINKING TIME

- · The available data includes:
 - Lays, Nacho Cheese Doritos, Cool Ranch Doritos, Cheetos, Sun Chips, and Fritos ranked from 1 to 6
 - Geographic region: West, Central, or Eastern

ANALYSTS' JOB FOR THE TOP 1

- 1. Count all the first place votes for each chip type.
- 2. Divide the total first place votes for each chip type by the total number of votes.
- 3. Multiply that fraction by 20 to find how many bags there would be in a twenty pack, rounding as necessary.

ANALYSTS' EXAMPLE

ANALYSTS' JOB FOR THE TOP 4

- 1. Count all the first, second, third, and fourth place votes for each chip type.
- 2. Multiply the first place votes by four, the second place votes by three, the third place votes by two, and the fourth place votes by one.
- 3. Add the weighted votes for each chip type and divide by the total number of weighted votes.
- 4. Divide the weighted votes for each chip type by the total number of votes.
- 5. Multiply that fraction by 20 to find how many bags there would be in a twenty pack, rounding as necessary.

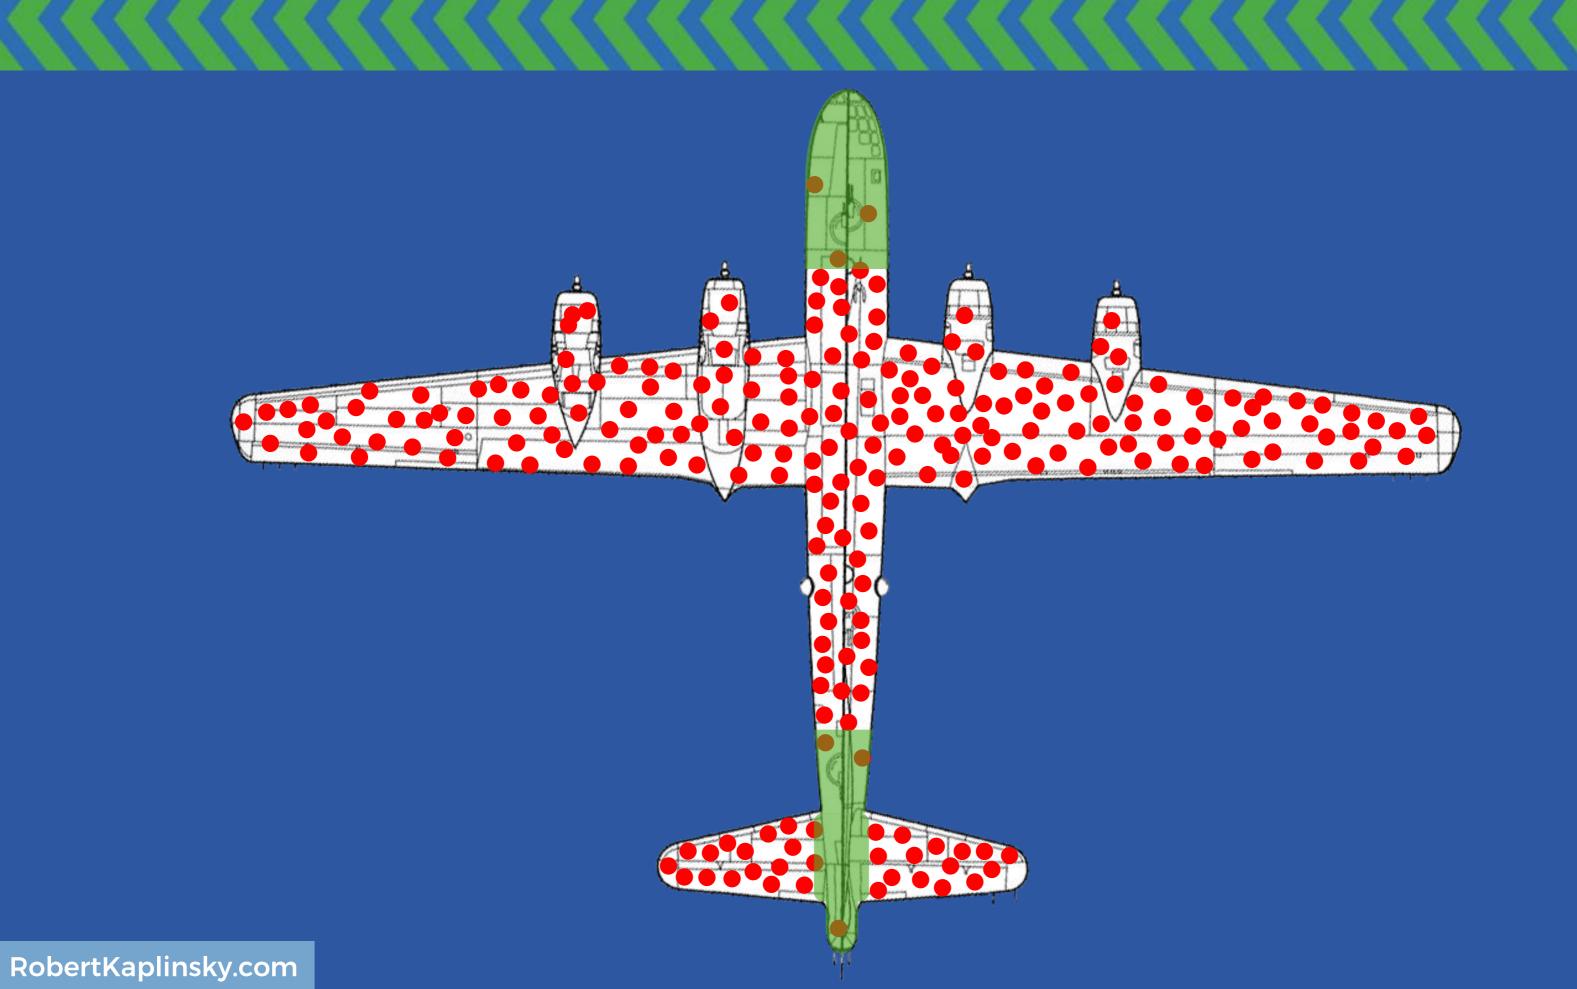

ANALYSTS' EXAMPLE

CHIP BAG RESULTS

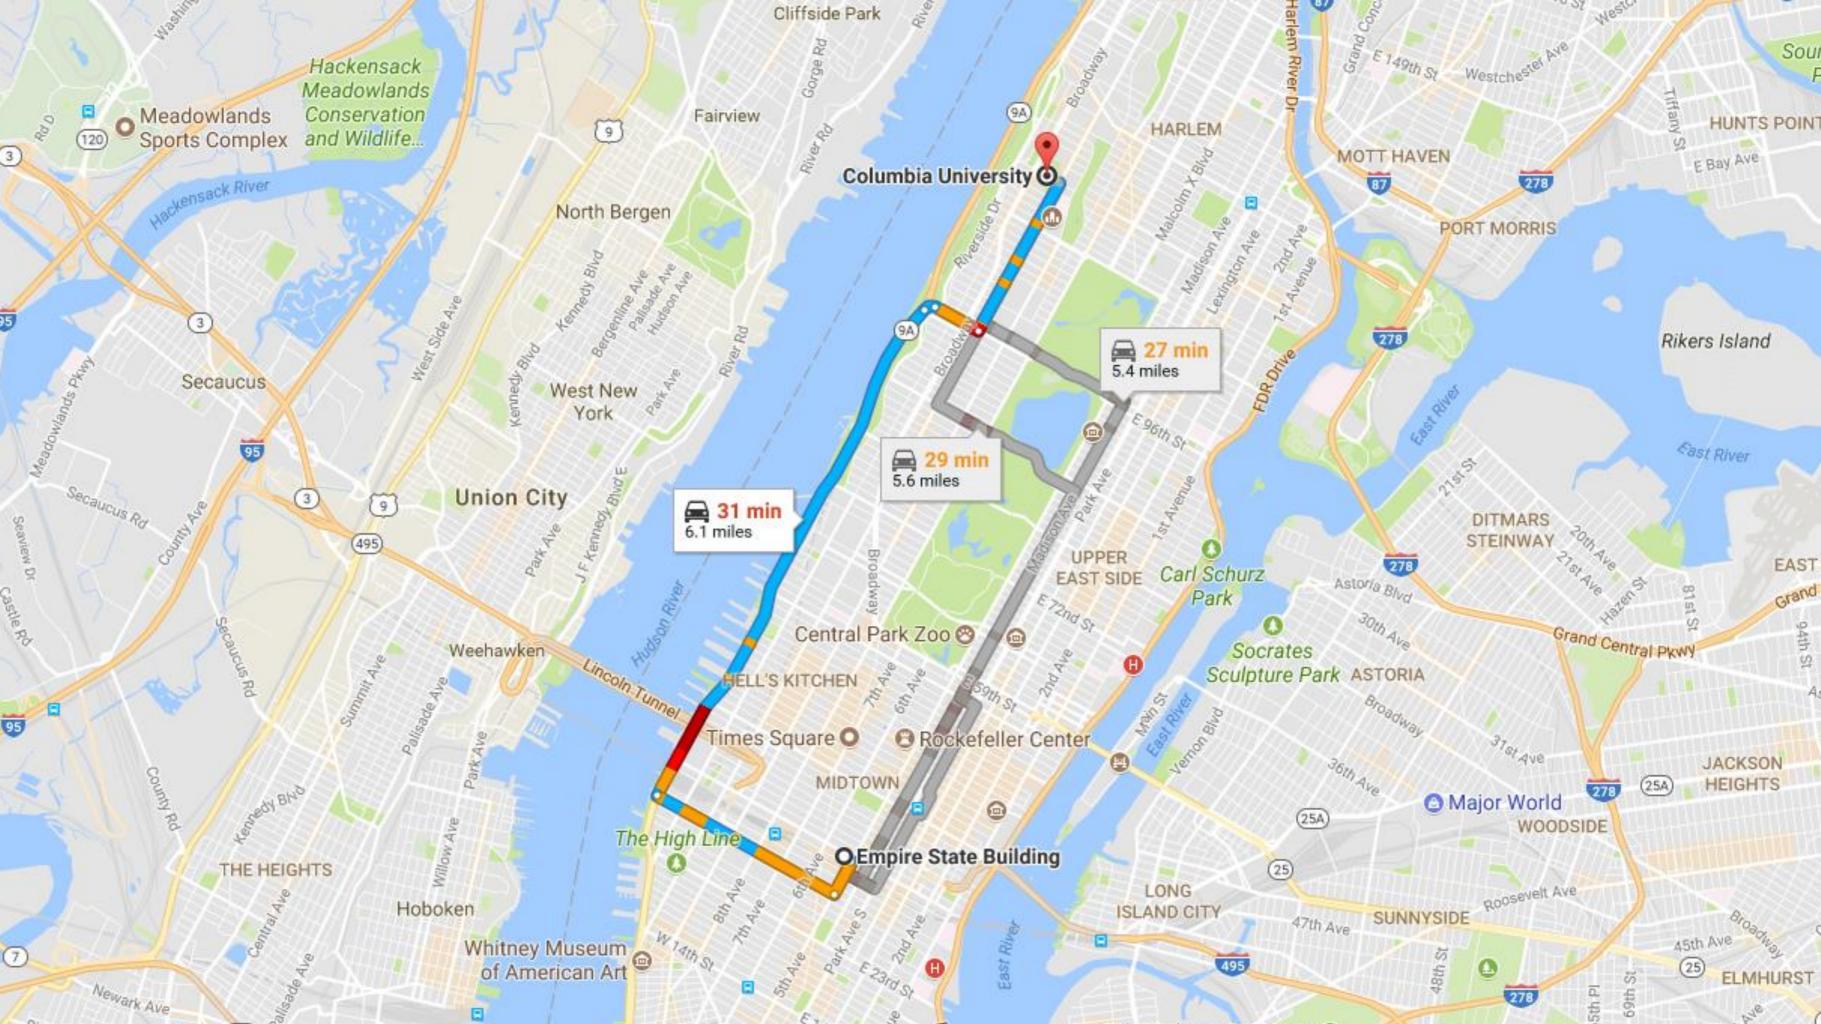

GOALS

- M HOW DO WE MAKE SENSE OF MATH MODELING?
- ☐ IS IT JUST ANSWERING QUESTIONS?
- HOW DO YOU PROFIT FROM MATH MODELING?
- **HOW DO WE HELP OUR STUDENTS IMPROVE?**
- ☐ WHERE CAN WE FIND MORE RESOURCES?

- · How do we protect our planes?
- Which parts of the plane are being hit by the most bullets?
- Which parts of the plane are the most critical to protect?

- How do we find the fastest route for each customer?
- How do we find the fastest route for each customer without impacting our other customers?

Classic Mix 20 Singles

4 LAY'S® Classic Potato Chips, 4 DORITOS® Nacho Cheese Flavored Tortilla Chips, 2 DORITOS® COOL RANCH® Flavored Tortilla Chips, 4 CHEETOS® Crunchy Cheese Flavored Snacks, 2 SUNCHIPS® Original Multigrain Snacks, 4 FRITOS® Original Com Chips (All 1 OZ. Each)

- How many of each flavor should we put in a package?
- How many of each flavor should we put in a package for each region?
- How can we determine if the extra cost of creating different packages will make us more money?

Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later.

CCSS MATH PRACTICE 4

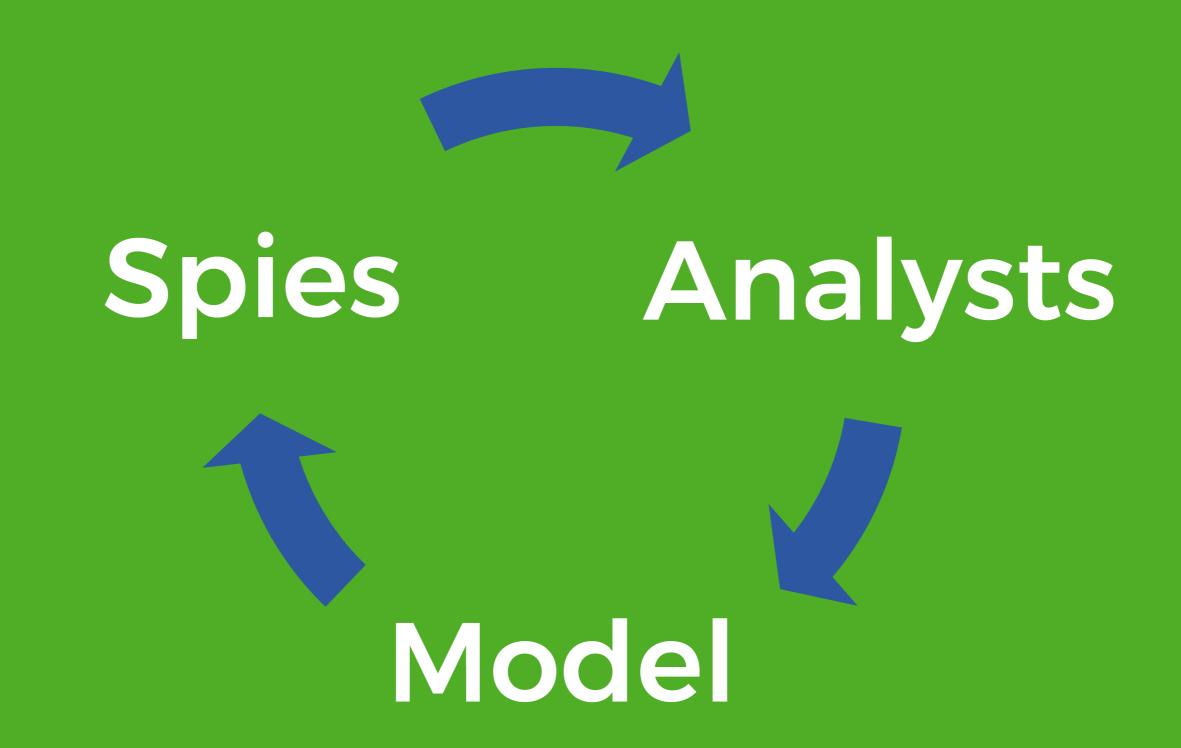

They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose.

CCSS MATH PRACTICE 4

They used 25 products for a pregnancy prediction' score including:

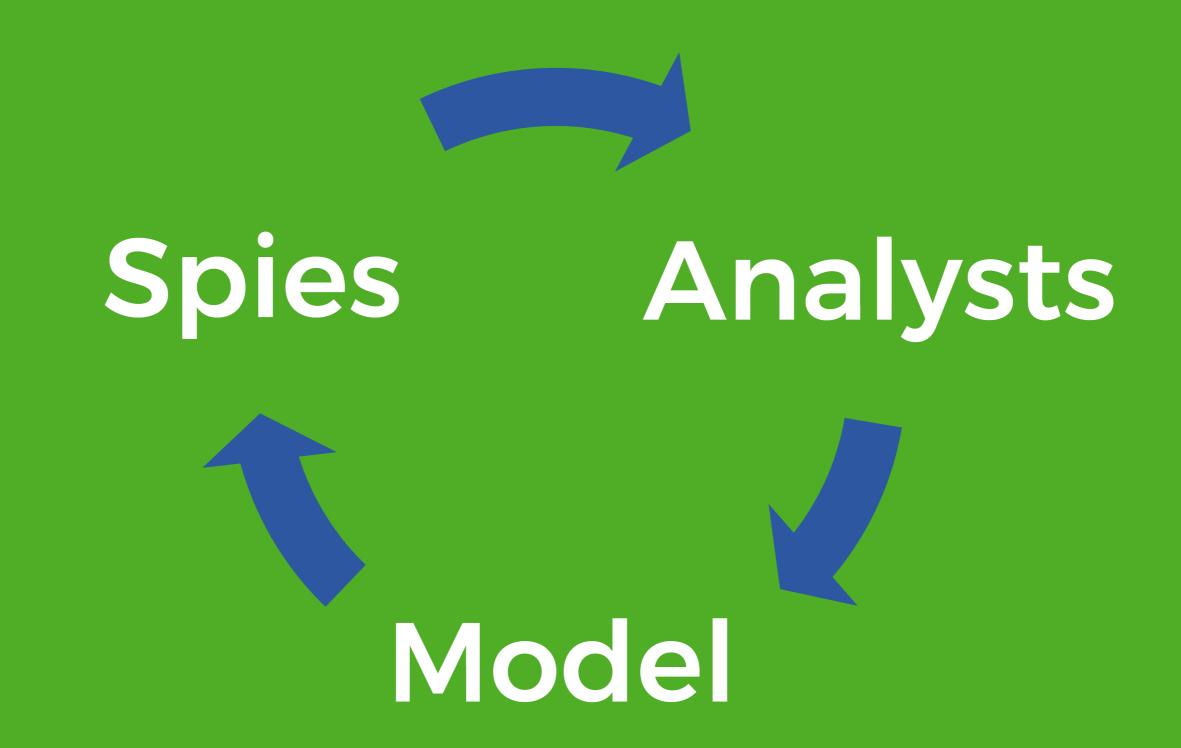

- unscented lotion
- mineral supplements
- cotton balls

Source: New York Times

ANALYSTS' EXAMPLE

- Add the number of bottles of unscented lotion, jars of mineral supplements, and bags of cotton balls.
- 2. Multiply that times the day of the week.
- 3. Click your heels twice.
- 4. Repeat the phrase "There's no place like home!"

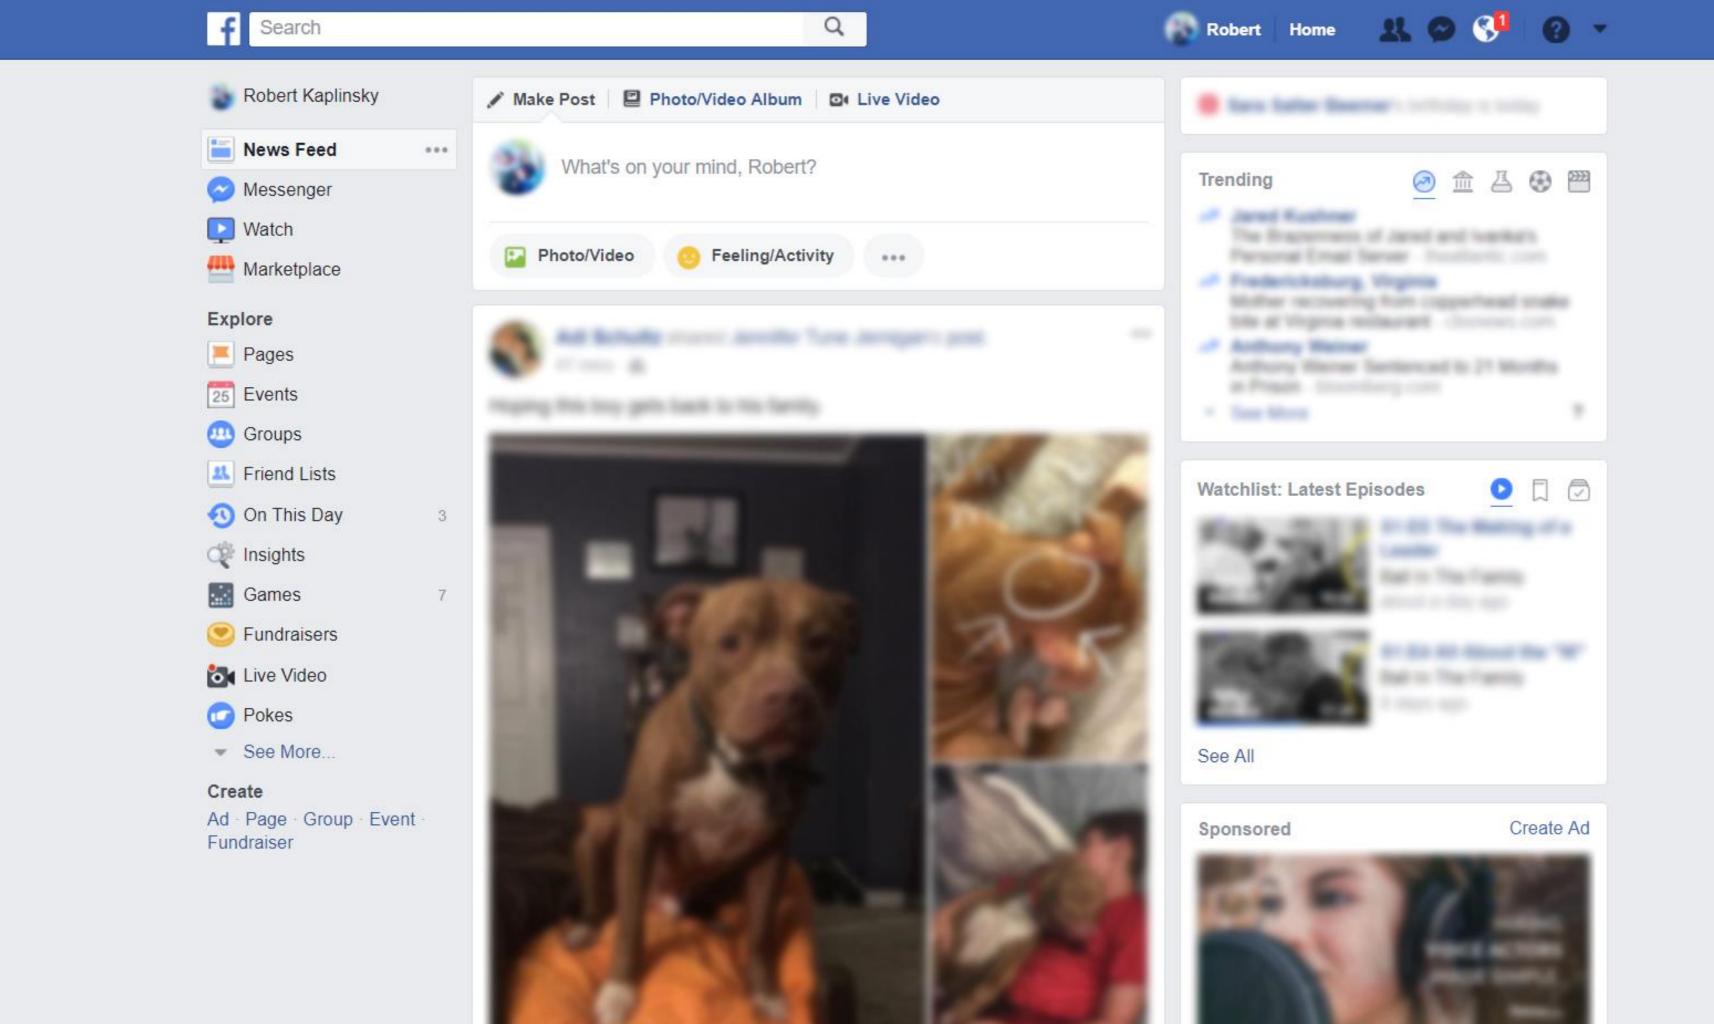

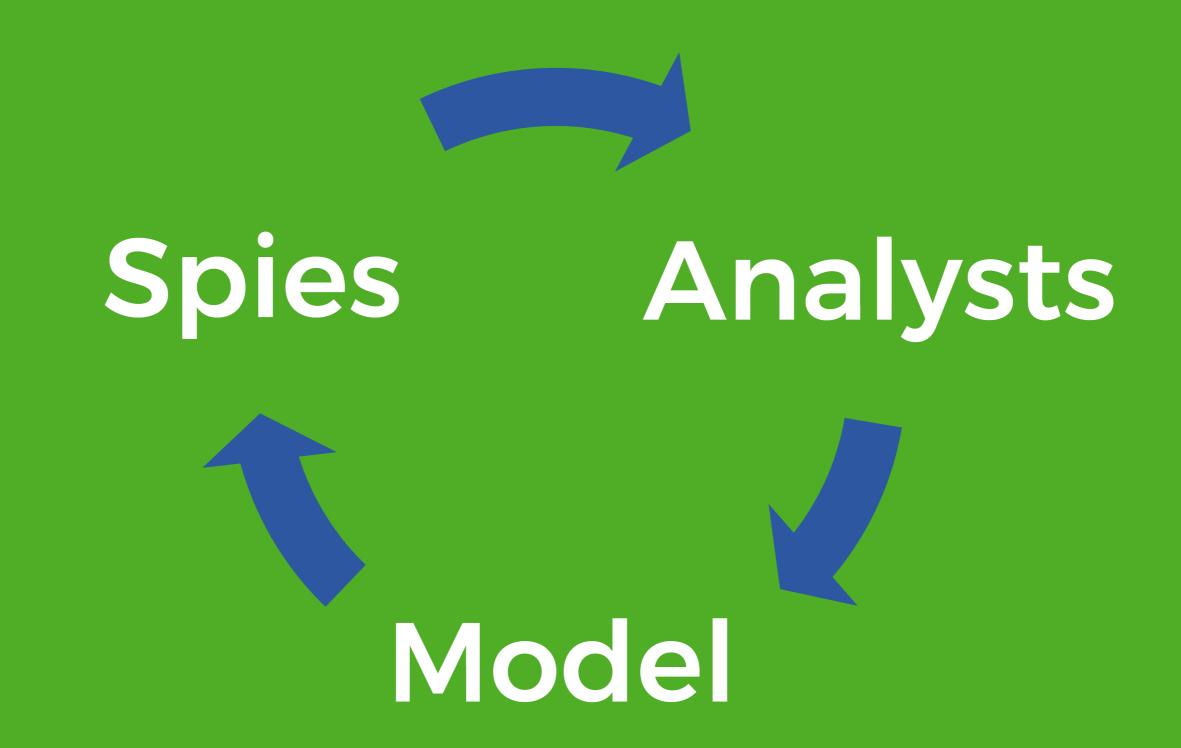

Priority is determined by:

- passenger's fare class
- itinerary
- · frequent flyer program membership
- check-in time

Source: United Airlines

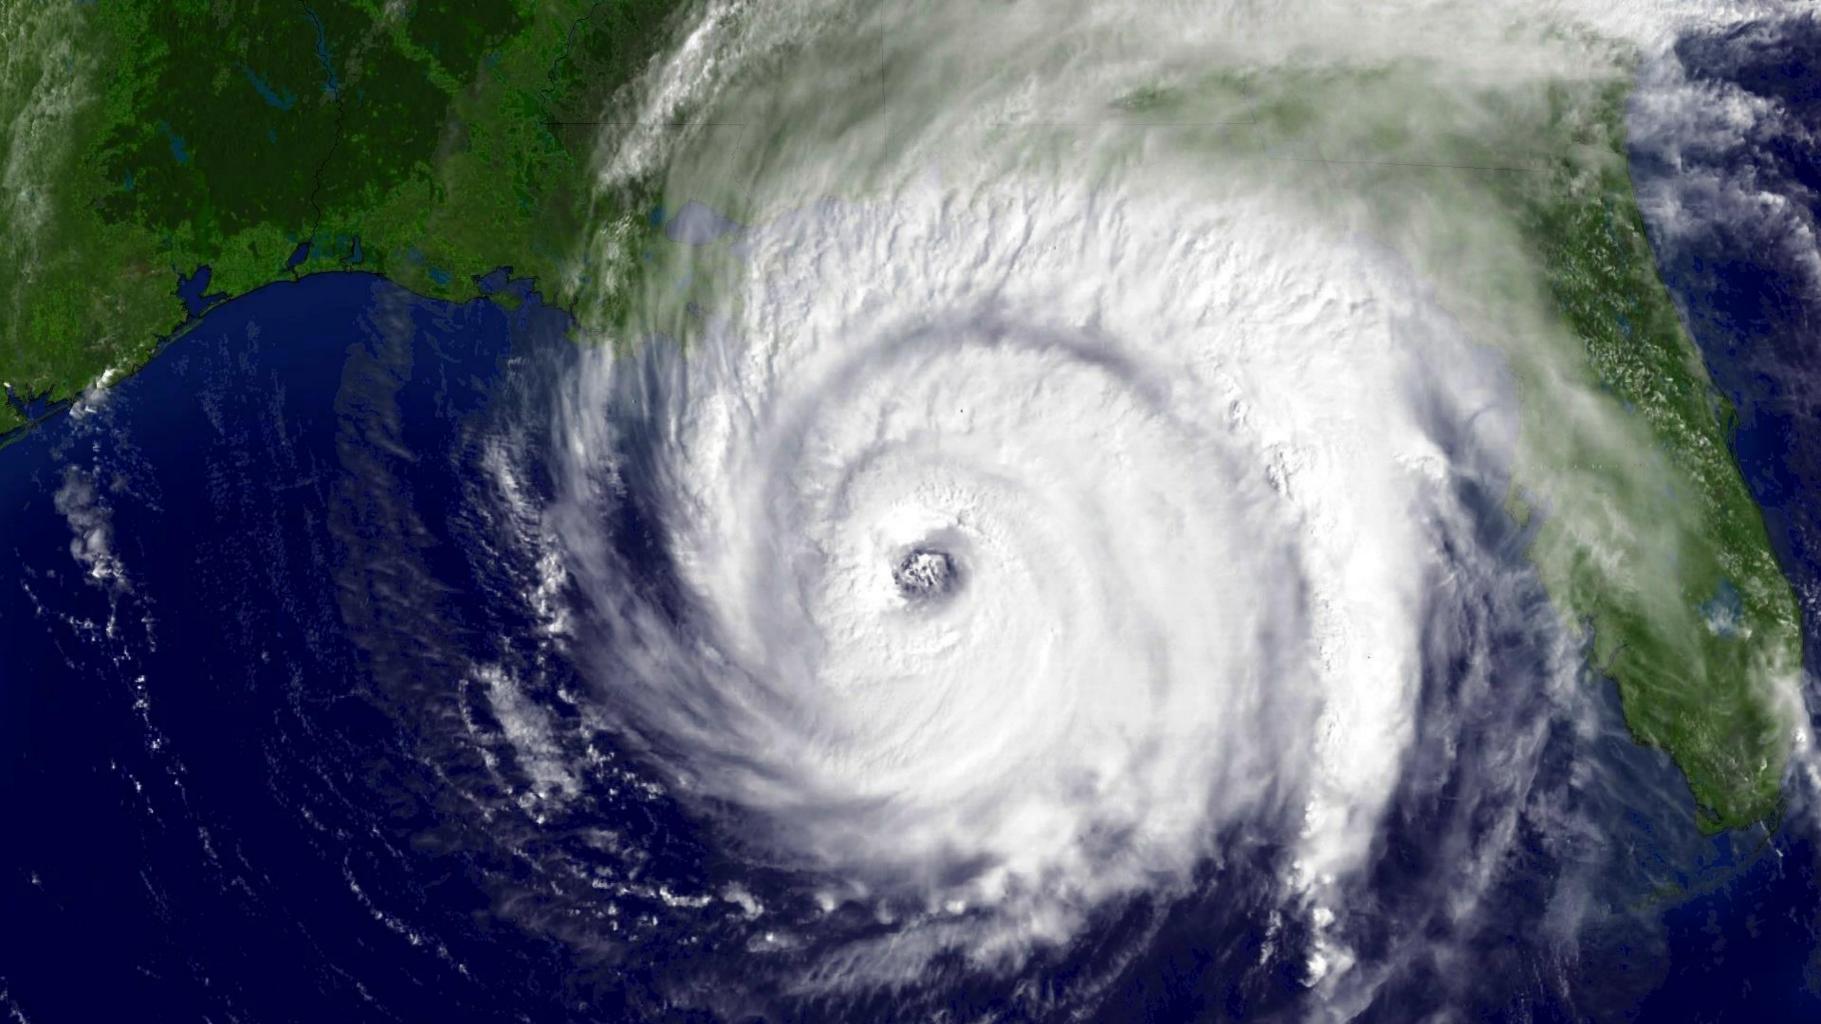

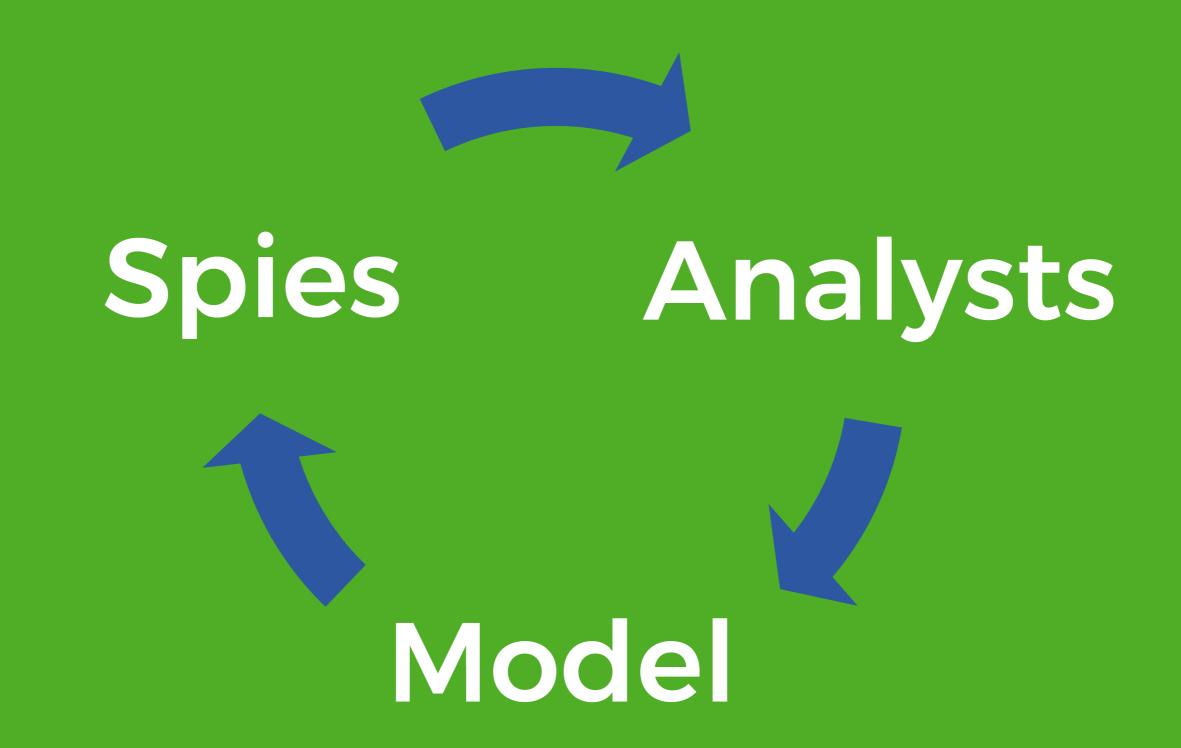

The stories that show in your News Feed are influenced by:

- friends you interact with the most
- the number of comments and likes a post receives
- what kind of story it is (ex: photo, video, status update)

Source: Facebook

The index has three levels:

- Green: full menu restaurant has power and damage is limited.
- Yellow: limited menu no power or only power from a generator, or food supplies may be low.
- Red: the restaurant is closed indicating severe damage.

How I Can Help You

Real World Problems

My workshops help teachers implement <u>problem-based</u>
<u>lessons</u> by helping them experience them from both
student and teacher perspective, leading to increase
students' success with performance tasks and the
Common Core State Standards.

Depth of Knowledge

Problems at higher <u>depth of knowledge</u> levels have the potential to challenge your most talented student yet remain accessible to everyone. I can help teachers develop best practices for implementing them so that students persevere longer towards finding the solution.
