Will Entering Your PIN in Reverse at an ATM Summon the Police?

Entering your PIN in reverse at any ATM will not automatically send an alarm to local police -- the idea is nothing more than an old and unimplemented suggestion.

CLAIM

Entering your PIN in reverse at any ATM will automatically summon the police.

See Example(s)

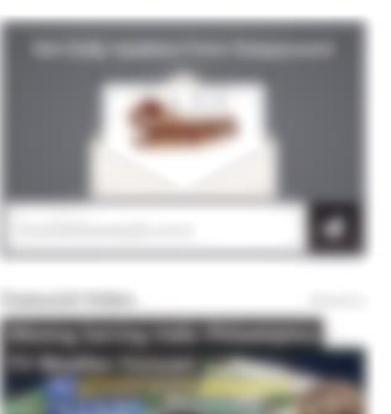

RATING

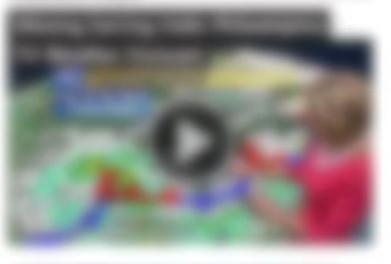

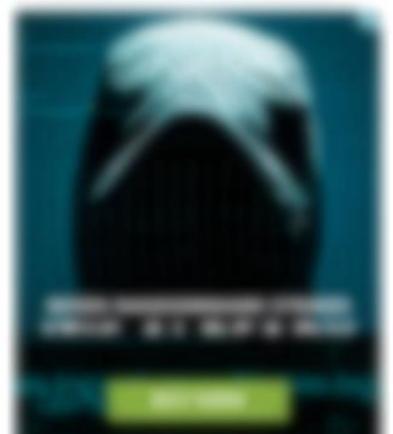

ORIGIN

Messages offering a seemingly helpful heads-up about how to deal with a situation in which one is forced to hand over money withdrawn from an ATM under duress began circulating on the Internet in September 2006:

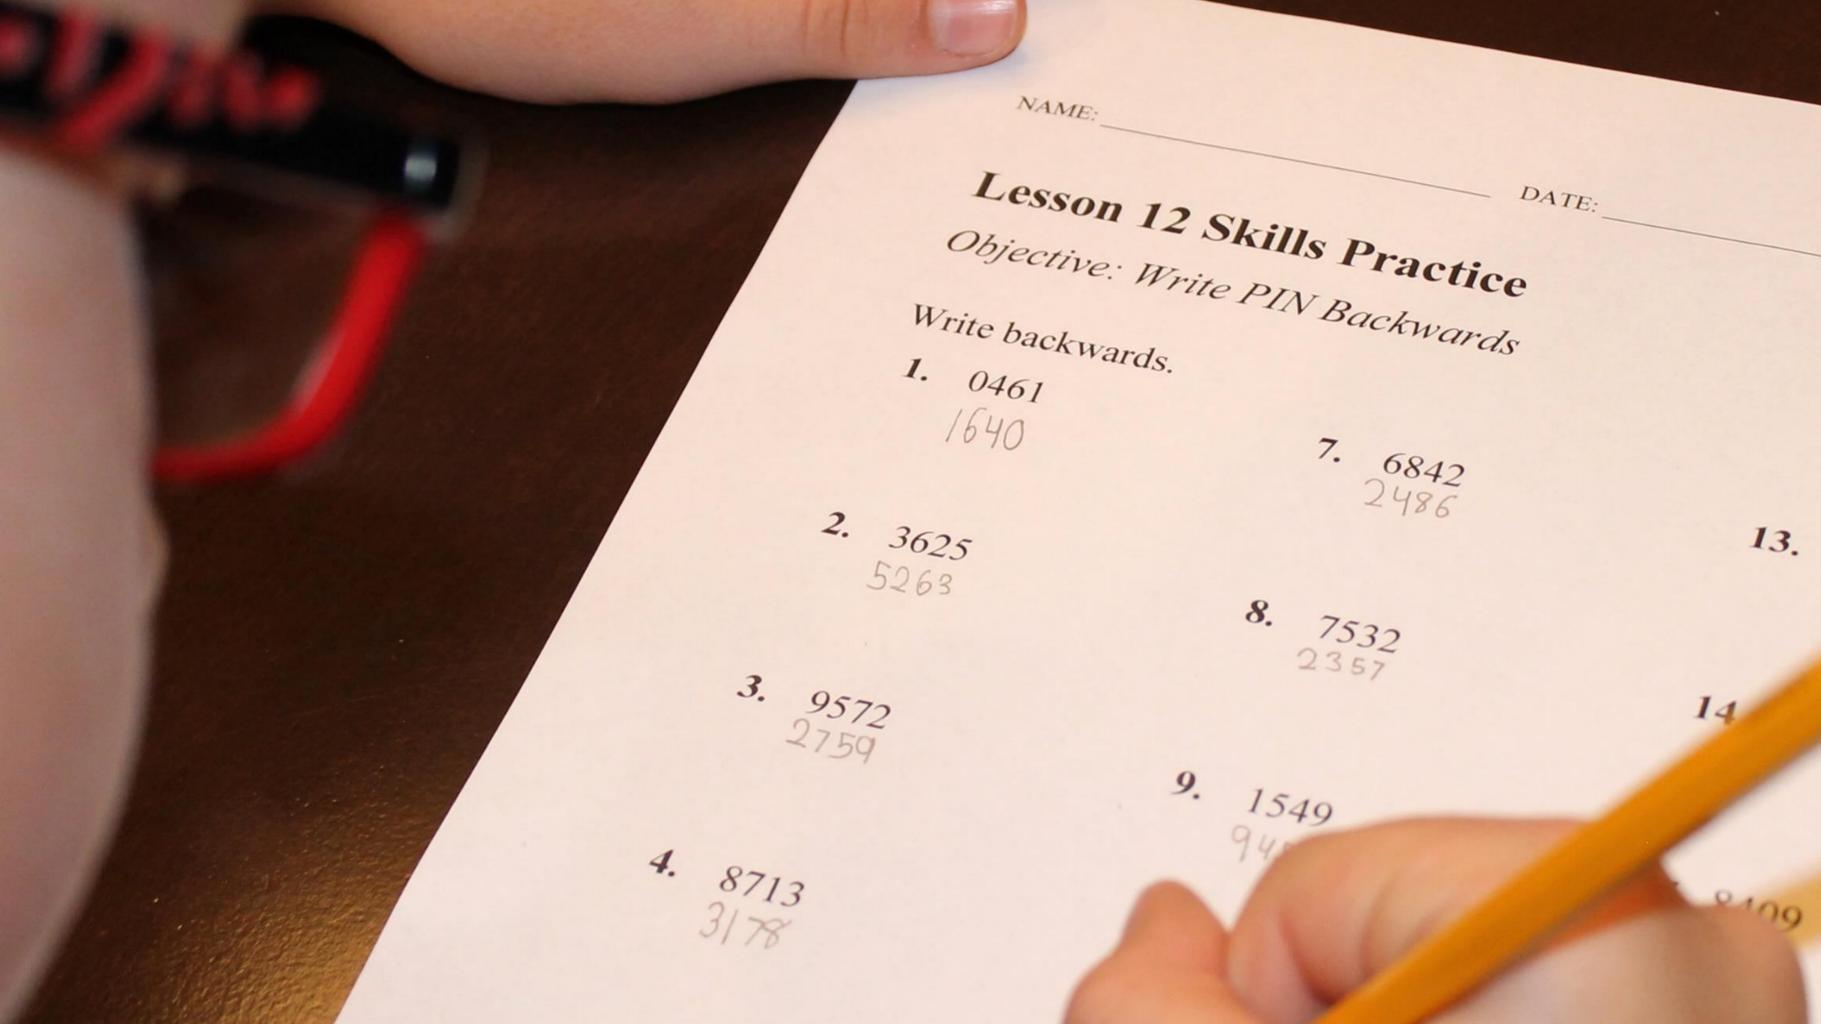

Tell them what you're going to tell them. Tell it to them. Then tell them what you told them.

UNKNOWN

Presentation

- Tell them what you're going to tell them.
- Tell it to them.
- Then tell them what you told them.

Lesson

• State the lesson objectives.

- Teach the lesson.
- Review the lesson objectives.

The definition of insanity is doing the same thing over and over again but expecting different results.

UNKNOWN

What is your conclusion? How did you reach that conclusion? I reached my answer by drawing a pictore of 16 Flosp and estimated where or the pictore, would the 1/3 cup would be. I also divided 16 by 3.

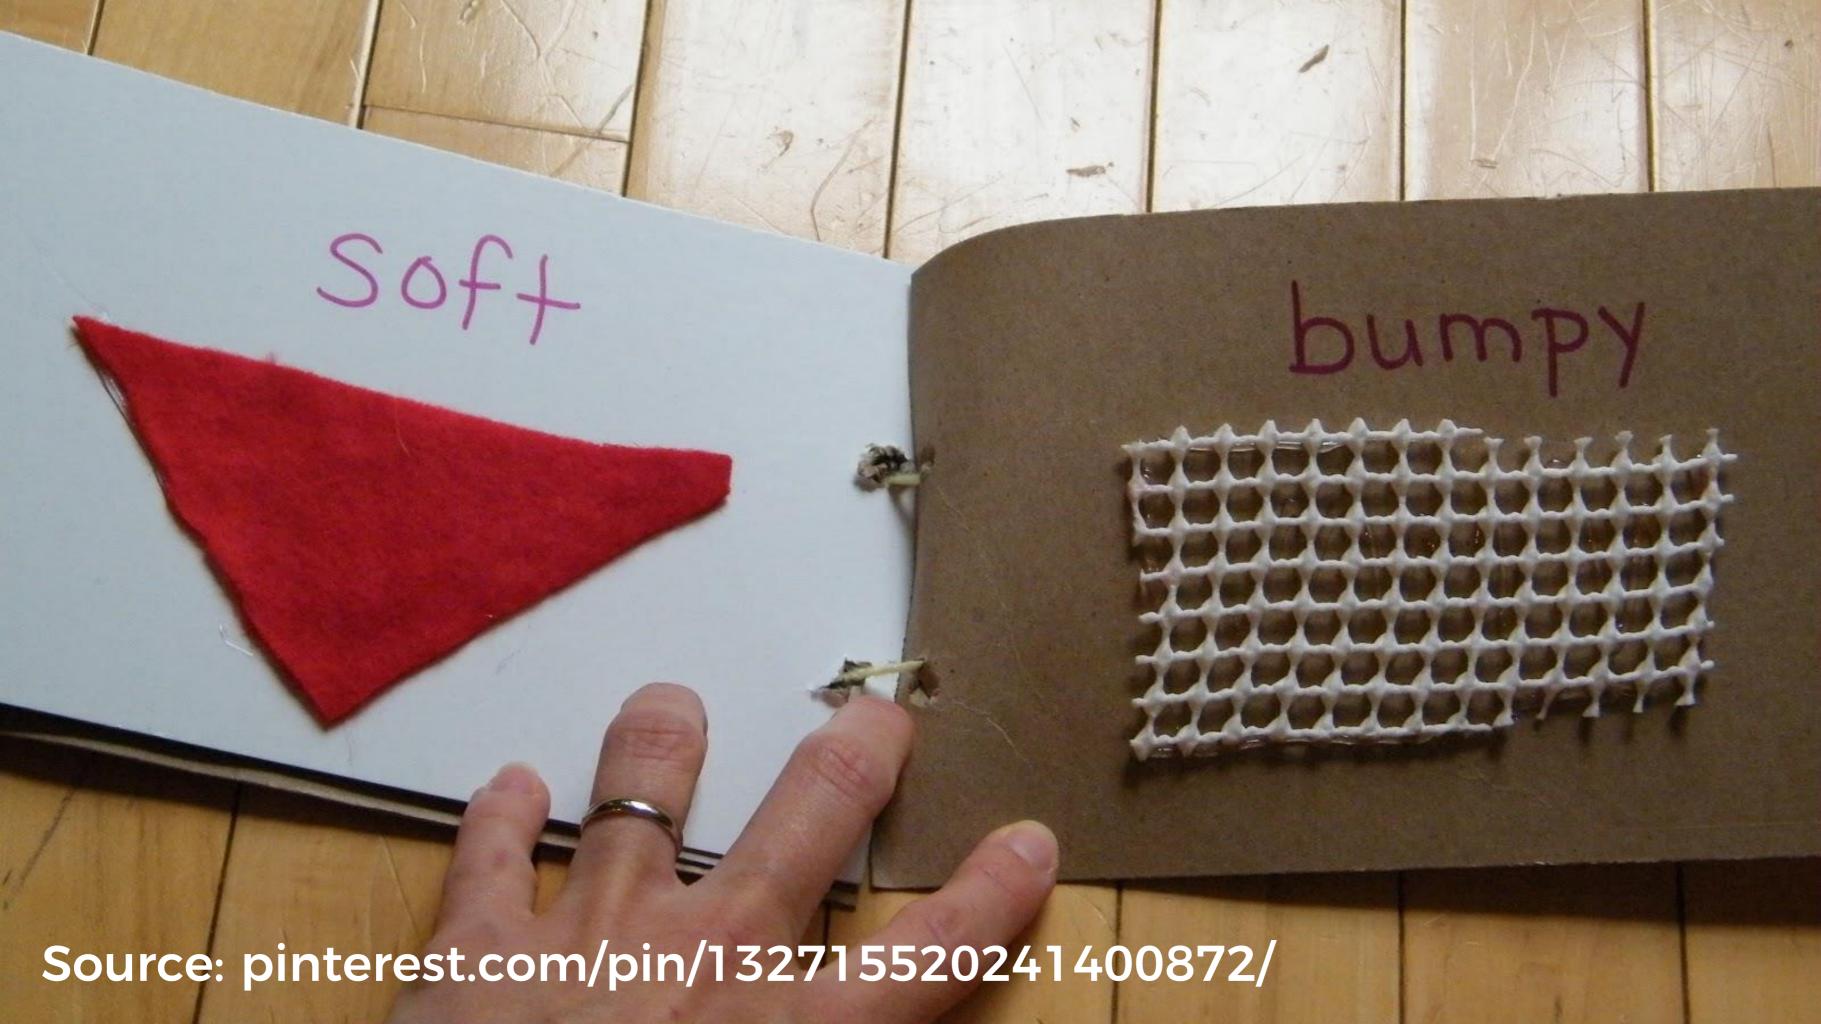

What is your conclusion? How did you reach that conclusion? First, I got the total amount of tablespoons that equal a cup, which is 16 Hosp. After, that, I divided 16 by 3 to find 13 of a cup. My quotient was 5 with a remainder of 1. So I divided the remainder to all three equal groups. My answer was that 13 of a cup of butter is 5.33 or 5 13 cups. To check, I multiplied 5.33 by 3 and my answer was 15.99. If you round that, you get 16.00 as the answer.

INVENTED STRATEGY

The main attraction for a busload of Dover fifth-graders was supposed to be the Museum of Fine Arts, but that all changed when they stopped by Kelly's Roast Beef and got a glimpse of their soda-drinking future.

At the entrance of Kelly's sat a sleek Coca-Cola Freestyle fountain crafted to resemble an old-fashioned vending machine, but with a twist: a touchscreen computer embedded in the machine gives customers the option of 125 flavors. You can quench your thirst with a Coke or a Sprite, or try something more exotic — Sprite with Grape or a Hi-C Orange Vanilla.

X-RAY VISION PROBLEMS

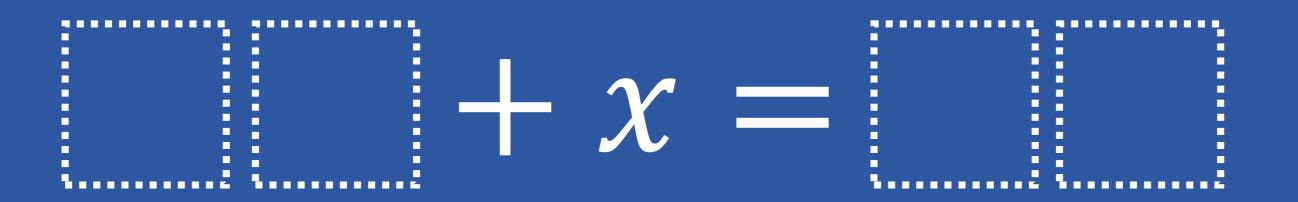

- WHY DO WE NEED THEM?
- **DWHY ARE THEY DIFFERENT?**
- **DHOW DO YOU IMPLEMENT THEM?**
- **HOW DO YOU CREATE YOUR OWN?**

PROBLEM ONE Solve for x.

$$21 + x = 70$$

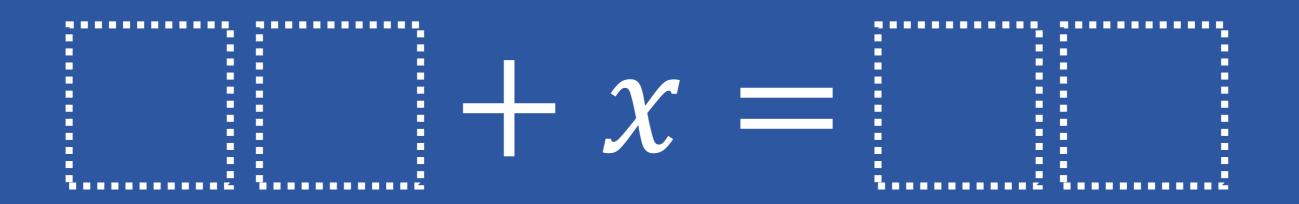

PROBLEM TWO

Using the digits 1 to 9, at most one time each, create two equations: one where x has a positive value and one where x has a negative value.

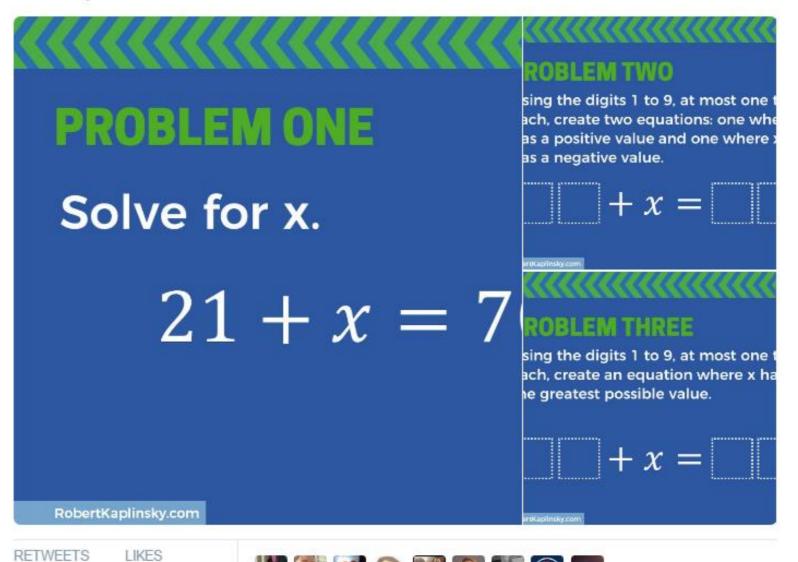

PROBLEM THREE

Using the digits 1 to 9, at most one time each, create an equation where x has the greatest possible value.

MS & HS #MTBoS Ts, please ask your Ss these 3 ?s and put the % who answered correctly here: docs.google.com/forms/d/e/1FAI Answers at top of form.

PROBLEM RESULTS

Depth of Knowledge Matrix - Secondary Math

Topic	Dividing Fractions	Solving Two-Step Equations	Exponents	Solving Equations with
				Variables on Both Sides
CCSS	• 6.NS.1	• 7.EE.4a	• 8.EE.1	• 8.EE.8
Standard(s)				 A-REI.3
DOK 1	Evaluate.	Solve for x.	Evaluate.	Solve for x.
Example	$\frac{4}{9} \div \frac{2}{5}$	2x + 3 = 9	3 ⁴	3x + 2 = -2x + 4
DOK 2	Use the digits 1 to 9, at most	Use the digits 1 to 9, at most	Use the digits 1 to 9, at most	Use the digits 1 to 9, at most
Example	one time each, to fill in the	one time each, to create two	one time each, to fill in the	two times each, to fill in the
	boxes to make two different	equations: one where x has a	boxes to make two true	boxes to make an equation
	pairs of fractions that have a	positive value and one where	number sentences.	with no solutions.
	quotient of 2/3.	x has a negative value.		
	$\frac{1}{3}$		= 64	
DOK 3	Use the digits 1 to 9, at most	Use the digits 1 to 9, at most	Use the digits 1 to 9, at most	Use the digits 1 to 9, at most
Example	one time each, to fill in the	one time each, to create an	one time each, to fill in the	one time each, to fill in the
	boxes to make two fractions	equation where x has the	boxes to make a result that	boxes so that the solution is
	that have a quotient that is as	greatest possible value.	has the greatest value	closest to zero.
	close to 4/11 as possible.		possible.	
	•			

Depth of Knowledge Matrix - Secondary Math

Topic	Geometric Proofs	Complex Numbers	Trigonometric Functions	Definite Integral
CCSS Standard(s)	• G-CO.11	• N-CN.2	• F-TF.3	• N/A
DOK 1 Example	Add one geometric marking to demonstrate the quadrilateral is a square.	Multiply the binomials. $(3+4i)(2+3i)$	Evaluate. $\sin\frac{\pi}{3}$	Solve. $\int_{2}^{6} x^{3} dx$
DOK 2 Example	Use exactly 5 geometric markings to show that a quadrilateral is a square.	Use the integers -9 to 9, at most one time each, to fill in the boxes twice: once to make a positive real number product and once to make a negative real number product. (+ i) (+ i)	Use the digits 1 to 9, at most one time each, to fill in the boxes and make two true number sentences. $\sin \frac{\pi}{1-\pi} = 0$	Use the digits 1 to 9, at most one time each, to fill in the boxes and make a positive and a negative solution. $\int_{-\infty}^{\infty} x^{-1} dx$
DOK 3 Example	What is the least number of geometric markings needed to demonstrate that a quadrilateral is a square?	Use the integers -9 to 9, at most one time each, to fill in the boxes and make a real number product with the greatest value. (+ i) (+ i)	Use the digits 1 to 9, at most one time each, so that the function has the greatest possible value. $\sin \frac{\pi}{1-\pi} = \frac{\sqrt{1-\pi}}{1-\pi}$	Use the digits 1 to 9, at most one time each, to fill in the boxes and make a solution that is as close to 100 as possible. $\int_{-\infty}^{\infty} x^{-1} dx$

DOK ONE

$$6.9 + a = 46$$

DOK TWO

11. Anton walked 8.9 miles of his 13.5-mile goal for this week. Use the equation m + 8.9 = 13.5 to find which path Anton should walk so that he meets

his goal for the week.

Path Lengths					
Meadow Path	3.2 miles				
Circle Path	4.2 miles				
Oak Tree Path	4.6 miles				

DOKTHREE

14. Reasoning Kyle bought a movie ticket for \$8.45 and a drink for \$1.80. He had just enough money remaining to buy a large popcorn. How much money did Kyle start with? Write an equation to show

your reasoning. © MP.2

Cost of Popcorn					
Small	\$2.85				
Medium	\$3.75				
Large	\$4.75				
Extra Large	\$4.85

Second attempt:	Points:/2 attempt/2 explanation

IMPLEMENTATION

- Open Middle Worksheet
- Classwork
 - Single problem for entire class
 - Extensions menu

QUESTION

Use the digits 1 to 9, at most one time each, to create an equation where x has the greatest possible value.

4 points

QUESTION #4

Use the digits 1 to 9, at most one time each, to make each equation true.

UESTION #2

Solve for x.

$$3x + 7 = 19$$

1 point SOLVING EQUATIONS

EXTENSION MENU

You must earn <u>at least 12</u>
<u>points</u> by doing the
problems of your choice.
Circle the auestions you

QUESTION #3

Use the digits 1 to 9, at most one time each, to create two equations: one where x has a positive value and one where x has a negative value.

$$+x=$$
 2 points

QUESTION #5

Use the digits 1 to 9, at most one time each, to create an equation where x has the greatest possible value.

IMPLEMENTATION

 - Single problem for entire class
 - Extensions menu
- Homework
- Assessments

X-RAY VISION PROBLEMS

- WHY DO WE NEED THEM?
- WHY ARE THEY DIFFERENT?
- MHOW DO YOU IMPLEMENT THEM?
- **DHOW DO YOU CREATE YOUR OWN?**

STEP ONE

- Find a One-Operation Problem
 - Addition
 - Subtraction
 - Multiplying
 - Dividing
 - Exponents (including square root)
 - Trigonometric functions

ADDING 2-DIGIT NUMBERS

Solve.

MULTIPLYING FRACTIONS

Solve.

THINKINGTIME

STEP TWO

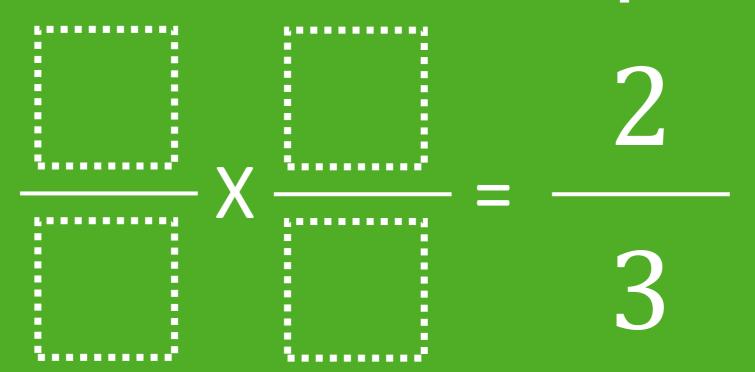

- Go from DOK 1 to DOK 2
 - Strategically remove some information from the problem to prevent immediate calculation
 - Increase the quantity of solutions needed to increase the need to look for patterns

ADDING 2-DIGIT NUMBERS

Using the digits 1 to 9, at most one time each, fill in the boxes to make two different pairs of two-digit numbers that have a sum of 71.

MULTIPLYING FRACTIONS

Using the digits 1 to 9, at most one time each, fill in the boxes to make two different pairs of fractions that have a product of 2/3.

THINKING TIME

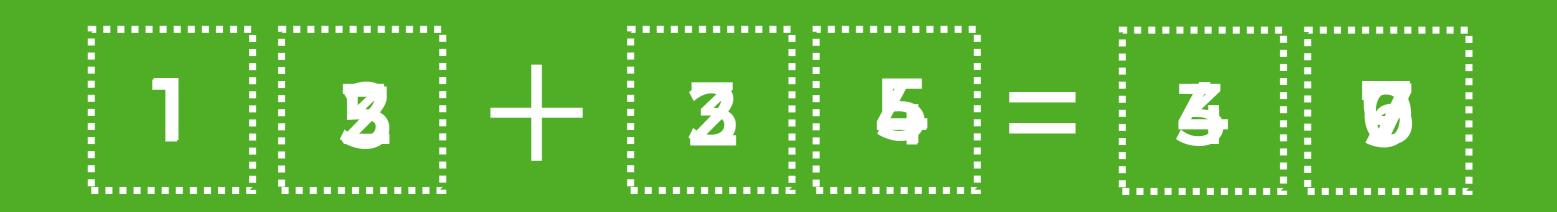

- · Go from DOK 1 to DOK 2
 - Strategically remove some information from the problem to prevent immediate calculation
 - Increase the quantity of solutions needed to increase the need to look for patterns

STEP THREE

- Go from DOK 2 to DOK 3
 - Introduce the need to optimize the solution by making the greatest or least product / sum / difference / quotient / answer.
 - Another optimization option is make the answer closest to a specific value.

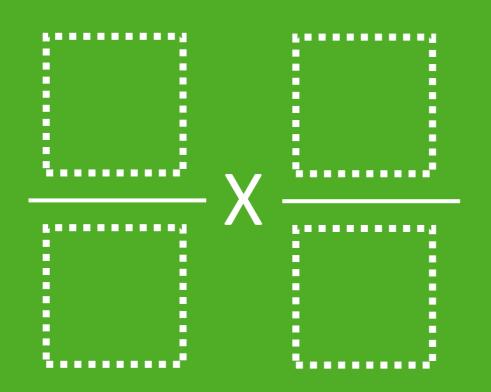

ADDING 2-DIGIT NUMBERS

Using the digits 1 to 9, at most one time each, fill in the boxes to make the smallest sum.

MULTIPLYING FRACTIONS

Using the digits 1 to 9, at most one time each, fill in the boxes to make two fractions that have a product that is as close to 4/11 as possible.

THINKING TIME

- · Go from DOK 2 to DOK 3
 - Introduce the need to optimize the solution by making the greatest or least product / sum / difference / quotient / answer.
 - Another optimization option is make the answer closest to a specific value.

3 Steps to Increase Math DOK Levels

Step 1: Find a One-Operation Problem

- Procedural problems with one operation are easiest to modify.
- Other problems may also be modified but may not be as easy.

Adding 2-Digit Numbers

Multiplying Fractions

$$\frac{3}{7} \times \frac{2}{9} =$$

Trigonometry

Solve.

$$\sin\frac{\pi}{3} =$$

Step 2: Go from DOK 1 to DOK 2

- Strategically remove some information from the problem to prevent immediate calculation
- Increase the quantity of solutions needed to increase the need to look for patterns

Adding 2-Digit Numbers
Using the digits 1 to 9, at most one time each, fill in the boxes

Multiplying Fractions
Using the digits 1 to 9, at most one time each, fill in the boxes

Trigonometry
Using the digits 1 to 9, at most one time each, fill in the boxes

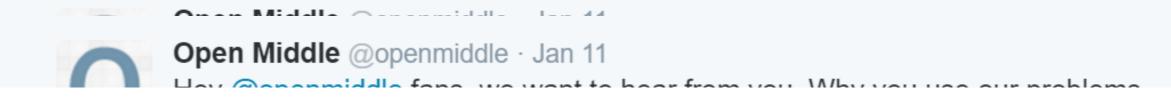

X-RAY VISION PROBLEMS

WHY DO WE NEED THEM?

WHY ARE THEY DIFFERENT?

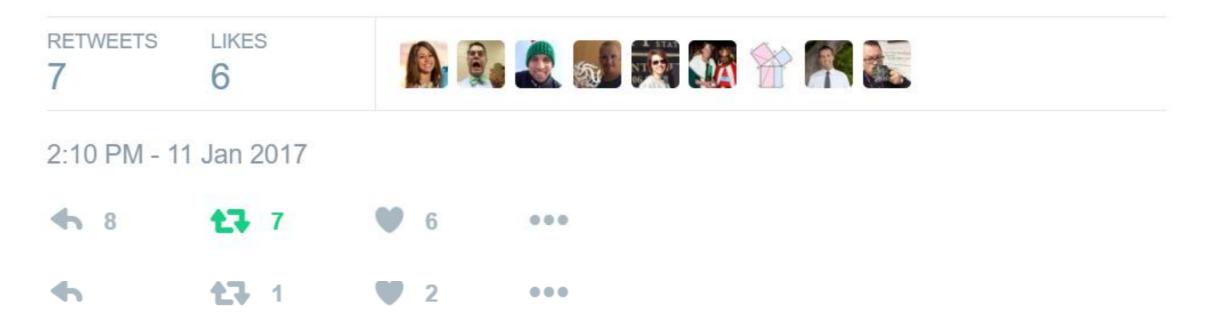

MHOW DO YOU IMPLEMENT THEM?

HOW DO YOU CREATE YOUR OWN?

Hey @openmiddle fans, we want to hear from you. Why do you use our problems with your students? Share your success stories or lessons learned.

DISCUSSION TIME

- How can x-ray vision problems like the kinds on Open Middle spot misconceptions that may often go unnoticed?
- How do Open Middle problems make mathematics accessible yet appropriately challenging for every student?

GOALS

- CORRECT ANSWERS = UNDERSTANDING?
- MAKE OUR LESSONS UNFORGETTABLE
- RECONSIDER USING WORD PROBLEMS
- MAKE MATH CHALLENGING + ACCESSIBLE
