

ALWAYS	SOMETIMES	NEVER
1. You can't simplify a fraction with an odd denominator.	2. Fractions are numbers less than one.	3. The bigger the denominator, the bigger the pieces.
4. One-third is one of three pieces.	5. Fractions have a value between 0 and 1.	6. Tenths are smaller than hundredths
7. If two fractions have the same denominator, the one with one with the larger numerator is greater.	8. Equal-sized pieces have the same shape.	9. You can represent the area of the fraction like 1/2 in different ways as long as they have each have the same total area.
10. Fifths are bigger than sixths	11. The numerator is less than the denominator.	12. $\frac{3}{5} > \frac{3}{4}$
13. The fractions 1/2, 3/6, and 4/8 all appear in the same place on a number line.	14. The bigger the numerator, the more pieces there are.	15. $\frac{3}{6} > \frac{1}{2}$
